If the Fund estimates that it has distributed more than its income and net realized capital gains, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund’s investment performance and should not be confused with “yield” or “income”.

The amounts and sources of distributions reported in this 19(a) Notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund’s investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

The following table provides GEQ’s total return performance based on net asset value (NAV) over various time periods compared to GEQ’s annualized and cumulative distributions rates.

|  |       |
|--|-------|
| Average annual total return (in relation to NAV) for the period since inception (October 27, 2011) to March 31, 2016 | 7.47% |
| Annualized current distribution rate expressed as a percentage of NAV as of March 31, 2016                           | 9.67% |
| Cumulative total return (in relation to NAV) for the fiscal year through March 31, 2016                              | 0.61% |
| Cumulative fiscal year distributions as a percentage of NAV as of March 31, 2016                                     | 2.42% |
