- <sup>††</sup> Value determined based on Level 2 inputs, unless otherwise noted See Note 4 .
- <sup>†††</sup> Value determined based on Level 3 inputs See Note 4.
- Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.
- <sup>1</sup> Security is a 144A or Section 4(a) (2) security. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a) (2) securities is \$22,710,457 (cost \$22,712,678), or 81.9% of total net assets.
- <sup>2</sup> Rate indicated is the 7-day yield as of March 31, 2025.
- <sup>3</sup> Security is unsettled at period end and does not have a stated effective rate.
- <sup>4</sup> Security is a step up/down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity. Rate indicated is the rate at March 31, 2025. See table below for additional step information for each security.
- <sup>5</sup> Security is an interest-only strip.
- <sup>6</sup> Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.
- <sup>7</sup> Rate indicated is the effective yield at the time of purchase.
- <sup>8</sup> All or a portion of this security is pledged as swap collateral at March 31, 2025.
- <sup>9</sup> Zero coupon rate security.

\*\* This derivative is reported as unrealized appreciation/depreciation at period end.

The following is a summary of significant unobservable inputs used in the fair valuation of assets and liabilities categorized within Level 3 of the fair value hierarchy:

Category	Ending Balance at March 31, 2025	Valuation Technique	Unobservable Inputs	Input Range	Weighted Average
Assets:					
Asset-Backed Securities	\$ 125,000	Third Party Pricing	Broker Quote	_	_
		Option adjusted spread off prior			
Asset-Backed Securities	101,236	month end broker quote	Broker Quote	—	—
Corporate Bonds	100,000	Third Party Pricing	Broker Quote	_	_
Senior Floating Rate Interests	9,102	Model Price	Purchase Price	_	
Total Assets	\$ 335,338				
Liabilities:					
Unfunded Loan Commitments	\$ 4	Model Price	Purchase Price	_	_

Significant changes in a quote would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund had no securities that transferred into or out of Level 3.

#### Summary of Fair Value Level 3 Activity

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, yield or liquidation value would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund had securities with a total value of \$31 transfer into Level 3 from Level 2 due to a lack of observable inputs and did not have any securities transfer out of Level 3.

<sup>a</sup> Unaudited figures for the period ended March 31, 2025. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

<sup>b</sup> Net investment income (loss) per share was computed using average shares outstanding throughout the period.

<sup>c</sup> Total return does not reflect the impact of any applicable sales charges.

<sup>d</sup> Does not include expenses of the underlying funds in which the Fund invests.

<sup>e</sup> Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

<sup>f</sup> The portion of the ratios of net expenses to average net assets attributable to recoupments of prior fee reductions or expense reimbursements for the years presented was as follows:

	03/31/25 <sup>a</sup>	09/30/24	09/30/23	09/30/22	09/30/21	09/30/20

Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, yield, liquidation value or valuation multiple would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund had securities with a total value of \$21,168,036 transfer out of Level 3 into Level 2 due to the availability of current and reliable market-based data provided by a third-party pricing service which utilizes significant observable inputs.

#### **Summary of Fair Value Level 3 Activity**

<sup>a</sup> Unaudited figures for the period ended March 31, 2025. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

<sup>b</sup> Net investment income (loss) per share was computed using average shares outstanding throughout the period.

<sup>c</sup> Total return does not reflect the impact of any applicable sales charges.

 $^{\rm d}$  Does not include expenses of the underlying funds in which the Fund invests.

<sup>e</sup> Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

<sup>f</sup> The portion of the ratios of net expenses to average net assets attributable to recoupments of prior fee reductions or expense reimbursements for the periods presented was as follows:

	03/31/25ª	09/30/24	09/30/23	09/30/22	09/30/21	09/30/20

Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

The following is a summary of significant unobservable inputs used in the fair valuation of assets and liabilities categorized within Level 3 of the fair value hierarchy:

Category	Ending Balance at March 31, 2025	Valuation Technique	Unobservable Inputs	Input Range	Weighted Average*
Assets:					
Common Stocks	\$ 858,336	Model Price	Liquidation Value

Total Assets	\$ 2,377,519				
Liabilities:					
Unfunded Loan Commitments	\$ 433	Model Price	Purchase Price		_

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, liquidation value or valuation multiple would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund did not have any securities to transfer into Level 3 from Level 2 and had securities with a total value of \$1,644,000 transfer out of Level 3 into Level 2 due to the availability of current and reliable market-based data provided by a third-party pricing service which utilizes significant observable inputs.

#### Summary of Fair Value Level 3 Activity

<sup>a</sup> Unaudited figures for the period ended March 31, 2025. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

<sup>b</sup> Redemption fees collected are less than \$0.01 per share.

<sup>c</sup> Net investment income (loss) per share was computed using average shares outstanding throughout the period.

<sup>d</sup> Total return does not reflect the impact of any applicable sales charges.

<sup>e</sup> Does not include expenses of the underlying funds in which the Fund invests.

<sup>f</sup> Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

<sup>g</sup> The portion of the ratios of net expenses to average net assets attributable to recoupments of prior fee reductions or expense reimbursements for the years presented was as follows:

	03/31/25 <sup>a</sup>	09/30/24	09/30/23	09/30/22	09/30/21	09/30/20

<sup>†††</sup> Value determined based on Level 3 inputs — See Note 4.

- Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.
- <sup>1</sup> Affiliated issuer.
- <sup>2</sup> Rate indicated is the 7-day yield as of March 31, 2025.
- <sup>3</sup> Security is unsettled at period end and may not have a stated effective rate.
- <sup>4</sup> Security is an interest-only strip.
- <sup>5</sup> Security is a 144A or Section 4(a) (2) security. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a) (2) securities is \$2,401,695,943 (cost \$2,440,634,018), or 48.2% of total net assets.
- <sup>6</sup> Security is a step up/down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity. Rate indicated is the rate at March 31, 2025. See table below for additional step information for each security.
- <sup>7</sup> Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

<sup>8</sup> Perpetual maturity.

- <sup>9</sup> All or a portion of this security is pledged as equity index swap collateral at March 31, 2025.
- <sup>10</sup> Security has no stated coupon. However, it is expected to receive residual cash flow payments on defined deal dates.
- <sup>11</sup> Security is a 144A or Section 4(a) (2) security. These securities have been determined to be illiquid and restricted under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a) (2) illiquid and restricted securities is \$50 (cost \$0), or 0.0% of total net assets See Note 10.

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, yield, market comparable yields, liquidation value or valuation multiple would generally result in significant changes in the fair value of the security. Any remaining Level 3 securities held by the Fund and excluded from the table above, were not considered material to the Fund.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund did not have any securities transfer into or out of Level 3.

### **Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated person, as defined in the Investment Company Act of 1940 ("affiliated issuer").

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II and Guggenheim Strategy Fund III (collectively, the "Guggenheim Strategy Funds"), each of which are open-end management investment companies managed by GI. The Guggenheim Strategy Funds, which launched on March 11, 2014, are offered as short-term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Guggenheim Strategy Funds pay no investment management fees. The Guggenheim Strategy Funds' annual report on Form N-CSR dated September 30, 2024 is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at https://www.sec.gov/Archives/edgar/data/1601445/000139834424022509/fp0090292-6\_ncsrixbrl.htm. The Fund also may invest in certain of the underlying series of Guggenheim Funds Trust, which are open-end management investment companies managed by GI, are available to the public and whose most recent annual report on Form N-CSR is available publicly or upon request.

Transactions during the period ended March 31, 2025, in which the company is an affiliated issuer, were as follows:

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, yield, liquidation value or valuation multiple would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund had securities with a total value of \$15,407,537 transfer into Level 3 from Level 2 due to a lack of observable inputs and had securities with a total value of \$44,797,759 transfer out of Level 3 into Level 2 due to the availability of current and reliable market-based data provided by a third-party pricing service which utilizes significant observable inputs.

#### **Repurchase Agreements**

Countonnontry and

The Fund may engage in repurchase agreements. Repurchase agreements are fixed income securities in the form of agreements backed by collateral. These agreements typically involve the acquisition by the Fund of securities from the selling institution coupled with the agreement that the selling institution will repurchase the underlying securities at a specified price and at a fixed time in the future. The Fund may accept a wide variety of underlying securities as collateral for the repurchase agreements entered into by the Fund. Any such securities serving as collateral are marked-to-market daily in order to maintain full collateralization. Securities purchased under repurchase agreements are reflected as an asset on the Fund's Consolidated Statement of Assets and Liabilities. Interest earned is recorded as a component of interest income on the Fund's Consolidated Statement of Operations.

In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian take possession of the underlying collateral. The collateral is in the possession of the Fund's custodian and is evaluated to ensure that its market value exceeds, at a minimum, 102% of the original face amount of the repurchase agreements, subject to minimum amounts to initiate a margin call, with the exception of where securities are being sold short. The interest rate on repurchase agreements is market driven and based on the underlying collateral obtained.

The use of repurchase agreements involves certain risks. For example, if the selling institution defaults on its obligation to repurchase the underlying securities at a time when the value of securities has declined, the Fund may incur a loss upon disposition of them. In the event of an insolvency or bankruptcy by the selling institution, the Fund's right to control the collateral could be affected and result in certain costs and delays. In addition, the Fund could incur a loss if the value of the underlying collateral falls below the agreed upon repurchase price.

At March 31, 2025, the repurchase agreements in the account were as follows:

#### **Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated person, as defined in the Investment Company Act of 1940 ("affiliated issuer").

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II and Guggenheim Strategy Fund III (collectively, the "Guggenheim Strategy Funds"), each of which are open-end management investment companies managed by GI. The Guggenheim Strategy Funds, which launched on March 11, 2014, are offered as short-term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Guggenheim Strategy Funds pay no investment management fees. The Guggenheim Strategy Funds' annual report on Form N-CSR dated September 30, 2024 is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at https://www.sec.gov/Archives/edgar/data/1601445/000139834424022509/fp0090292-6\_ncsrixbrl.htm. The Fund also may invest in certain of the underlying series of Guggenheim Funds Trust, which are open-end management investment companies managed by GI, are available to the public and whose most recent annual report on Form N-CSR is available publicly or upon request.

<sup>a</sup> Unaudited figures for the period ended March 31, 2025. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

<sup>b</sup> Net investment income (loss) per share was computed using average shares outstanding throughout the period.

<sup>c</sup> Total return does not reflect the impact of any applicable sales charges.

<sup>d</sup> Does not include expenses of the underlying funds in which the Fund invests.

<sup>e</sup> Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

<sup>f</sup> The portion of the ratios of net expenses to average net assets attributable to recoupments of prior fee reductions or expense reimbursements for the periods presented was as follows:

	03/31/25ª	09/30/24	09/30/23	09/30/22	09/30/21	09/30/20

\* Inputs are weighted by the fair value of the instruments.

Significant changes in a quote, yield, liquidation value or valuation multiple would generally result in significant changes in the fair value of the security.

The Fund's fair valuation leveling guidelines classify a single daily broker quote, or a vendor price based on a single daily or monthly broker quote, as Level 3, if such a quote or price cannot be supported with other available market information.

Transfers between Level 2 and Level 3 may occur as markets fluctuate and/or the availability of data used in an investment's valuation changes. For the period ended March 31, 2025, the Fund had securities with a total value of \$25,573,236 transfer into Level 3 from Level 2 due to a lack of observable inputs and had securities with a total value of \$16,375,965 transfer out of Level 3 into Level 2 due to the availability of current and reliable market-based data provided by a third-party pricing service which utilizes significant observable inputs.

#### Summary of Fair Value Level 3 Activity

### **Affiliated Transactions**

Investments representing 5% or more of the outstanding voting shares of a company, or control of or by, or common control under Guggenheim Investments ("GI"), result in that company being considered an affiliated person, as defined in the Investment Company Act of 1940 ("affiliated issuer").

The Fund may invest in certain of the underlying series of Guggenheim Strategy Funds Trust, including Guggenheim Strategy Fund II and Guggenheim Strategy Fund III (collectively, the "Guggenheim Strategy Funds"), each of which are open-end management investment companies managed by GI. The Guggenheim Strategy Funds, which launched on March 11, 2014, are offered as short-term investment options only to mutual funds, trusts, and other accounts managed by GI and/or its affiliates, and are not available to the public. The Guggenheim Strategy Funds pay no investment management fees. The Guggenheim Strategy Funds' annual report on Form N-CSR dated September 30, 2024 is available publicly or upon request. This information is available from the EDGAR database on the SEC's website at https://www.sec.gov/Archives/edgar/data/1601445/000139834424022509/fp0090292-6\_ncsrixbrl.htm. The Fund also may invest in certain of the underlying series of Guggenheim Funds Trust, which are open-end management investment companies managed by GI, are available to the public and whose most recent annual report on Form N-CSR is available publicly or upon request.

Transactions during the period ended March 31, 2025, in which the company is an affiliated issuer, were as follows:

<sup>a</sup> Unaudited figures for the period ended March 31, 2025. Percentage amounts for the period, except total return and portfolio turnover rate, have been annualized.

<sup>b</sup> Net investment income (loss) per share was computed using average shares outstanding throughout the period.

<sup>c</sup> Total return does not reflect the impact of any applicable sales charges.

<sup>d</sup> Does not include expenses of the underlying funds in which the Fund invests.

<sup>e</sup> Net expense information reflects the expense ratios after expense waivers and reimbursements, as applicable.

<sup>f</sup> The portion of the ratios of net expenses to average net assets attributable to recoupments of prior fee reductions or expense reimbursements for the years presented was as follows:

	03/31/25ª	09/30/24	09/30/23	09/30/22	09/30/21	09/30/20

Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

<sup>1</sup> Rate indicated is the 7-day yield as of March 31, 2025.

 $^2$  Rate indicated is the effective yield at the time of purchase.

<sup>3</sup> Security is a 144A or Section 4(a) (2) security. These securities have been determined to be liquid under guidelines established by the Board of Trustees. The total market value of 144A or Section 4(a) (2) securities is \$229,130,626 (cost \$232,803,531), or 48.0% of total net assets.

<sup>4</sup> Security has a fixed rate coupon which will convert to a floating or variable rate coupon on a future date.

<sup>5</sup> Security is a step up/down bond. The coupon increases or decreases at regular intervals until the bond reaches full maturity. Rate indicated is the rate at March 31,

2025. See table below for additional step information for each security.

<sup>6</sup> Security is an interest-only strip.

<sup>7</sup> Repurchase Agreements — The interest rate on repurchase agreements is market driven and based on the underlying collateral obtained. See additional disclosure in the repurchase agreements table below for more information on repurchase agreements.

### **Repurchase Agreements**

The Fund may engage in repurchase agreements. Repurchase agreements are fixed income securities in the form of agreements backed by collateral. These agreements typically involve the acquisition by the Fund of securities from the selling institution coupled with the agreement that the selling institution will repurchase the underlying securities at a specified price and at a fixed time in the future. The Fund may accept a wide variety of underlying securities as collateral for the repurchase agreements entered into by the Fund. Any such securities serving as collateral are marked-to-market daily in order to maintain full collateralization.

In connection with transactions in repurchase agreements, it is the Fund's policy that its custodian take possession of the underlying collateral. The collateral is in the possession of the Fund's custodian and is evaluated to ensure that its market value exceeds, at a minimum, 102% of the original face amount of the repurchase agreements.

The use of repurchase agreements involves certain risks. For example, if the selling institution defaults on its obligation to repurchase the underlying securities at a time when the value of securities has declined, the Fund may incur a loss upon disposition of them. In the event of an insolvency or bankruptcy by the selling institution, the Fund's right to control the collateral could be affected and result in certain costs and delays. In addition, the Fund could incur a loss if the value of the underlying collateral falls below the agreed upon repurchase price.

At March 31, 2025, the repurchase agreements in the account were as follows:

### Note 1 - Organization and Significant Accounting Policies

### Organization

Guggenheim Funds Trust (the "Trust"), a Delaware statutory trust, is registered with the U.S. Securities and Exchange Commission (the "SEC") under the Investment Company Act of 1940 (the "1940 Act"), as an open-ended investment company. The Trust may issue an unlimited number of authorized shares. The Trust consists of multiple series. Each series represents a separate fund (each, a "Fund" and collectively, the "Funds"). The Trust accounts for the assets of each Fund separately.

The Trust offers a combination of six separate classes of shares: Class A shares, Class C shares, Class P shares, Class R6 shares, SMA Class shares and Institutional Class shares. Sales of shares of each Class are made without a front-end sales charge at the net asset value per share ("NAV"), with the exception of Class A shares. Class A shares are sold at the NAV, plus the applicable front-end sales charge. The sales charge varies depending on the amount purchased. Class A share purchases of \$1 million or more are exempt from the front-end sales charge but have a 1% contingent deferred sales charge ("CDSC"), if shares are redeemed within 12 months of purchase. Class C shares have a 1% CDSC if shares are redeemed within 12 months of purchase. Class C shares of each Fund automatically convert to Class A shares of the same Fund on or about the 10th day of the month following the 8-year anniversary of the purchase of the Class C shares. This conversion will be executed without any sales charge, fee or other charge. After the conversion is completed, the shares will be subject to all features and expenses of Class A shares. Institutional Class shares are offered primarily for direct investment by institutions such as pension and profit sharing plans, endowments, foundations and corporations. Institutional Class shares require a minimum initial investment of \$2 million and a minimum account balance of \$1 million. Class R6 shares are offered primarily through qualified retirement and benefit plans. Class R6 shares are also offered through certain other plans and platforms sponsored by financial intermediaries. Certain institutional investors and others deemed appropriate by Guggenheim Investments ("GI" or the "Adviser") may also be eligible to purchase Class R6 shares subject to a \$2 million minimum initial investment. SMA Class shares may be purchased only by or on behalf of "wrap" account clients where Guggenheim Investments or an affiliate thereof has an agreement to serve as investment adviser or sub-adviser to the account with the wrap program sponsor (typically a registered investment adviser, bank or broker-dealer) or directly with the client. Certain other funds in the Guggenheim complex may also be eligible to purchase SMA Class shares. At March 31, 2025, SMA Class shares were only offered for Active INvestment Series (GAINS) - Core Plus Fund and Active INvestment Series (GAINS) - Limited Duration Fund. At March 31, 2025 the Trust consisted of ten Funds.

Class A, Class C, Class P, Institutional Class and Class R6 shares of High Yield Fund are subject to a 2% redemption fee when shares are redeemed or exchanged within 90 days of purchase.

This report covers the following Funds:

At March 31, 2025, Class A, Class C, Class P, Institutional Class, Class R6 and SMA Class shares have been issued by the Funds.

Guggenheim Partners Investment Management, LLC ("GPIM" or the "Adviser"), which operates under the name Guggenheim Investments ("GI"), provides advisory services to the Funds. Prior to November 29, 2024, Security Investors, LLC ("SI") an affiliate of GPIM, provided advisory services to Core Bond Fund, High Yield Fund and Municipal Income Fund and GPIM served as investment sub-adviser to Municipal Income Fund. In connection with an internal realignment of Guggenheim Investment's lines of business, effective on November 29, 2024, GPIM replaced SI as the Adviser for each such Fund. Guggenheim Funds Distributors, LLC ("GFD") serves as the distributor for the Trust. GI and GFD are affiliated entities.

### **Consolidation of Subsidiary**

The consolidated financial statements of the Macro Opportunities Fund include the accounts of a wholly-owned and controlled Cayman Islands subsidiary (the "Subsidiary"). Significant intercompany accounts and transactions have been eliminated in consolidation for the Macro Opportunities Fund. The Notes to Financial Statements presented herein are consolidated with respect to Macro Opportunities Fund and include the accounts of the Subsidiary.

The Macro Opportunities Fund may invest up to 25% of its total assets in its Subsidiary, which is intended to provide the Fund with exposure to certain investments consistent with the Fund's investment objective and policies while enabling the Fund to satisfy source-of- income requirements that apply to regulated investment companies ("RICs") under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code").

A summary of Macro Opportunities Fund's investment in its Subsidiary is as follows:

Fund	Inception Date of Subsidiary	Subsidiary Net Assets at March 31, 2025	% of Net Assets of the Fund at March 31, 2025
Macro Opportunities Fund	01/08/15	\$ 12,191,750	0.15%

### **Significant Accounting Policies**

The Funds operate as investment companies and, accordingly, follow the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services – Investment Companies.

The following significant accounting policies are in conformity with U.S. generally accepted accounting principles ("U.S. GAAP") and are consistently followed by the Trust. This requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. All time references are based on Eastern Time.

The NAV of each share class of each Fund is calculated by dividing the current value of the Fund's securities and other assets, less all liabilities attributable to the share class by the number of outstanding shares of the share class on the specified date.

### (a) Valuation of Investments

The Board of Trustees of the Funds (the "Board") has adopted policies and procedures for the valuation of the Funds' investments (the "Fund Valuation Procedures").

Pursuant to Rule 2a-5 under the 1940 Act, the Board designated the Adviser as the valuation designee to perform fair valuation determinations for each Fund with respect to all Fund investments and/or other assets. As the Funds' valuation designee pursuant to Rule 2a-5, the Adviser has adopted separate procedures (the "Valuation Designee Procedures" and collectively with the Fund Valuation Procedures, the "Valuation Procedures") reasonably designed to prevent violations of the requirements of Rule 2a-5 and Rule 31a-4 under the 1940 Act. The Adviser, in its role as valuation designee, utilizes the assistance of a valuation committee, consisting of representatives from Guggenheim's investment management, fund administration, legal and compliance departments (the "Valuation Committee"), in determining fair value of the Funds' securities and/or other assets. The Valuation Procedures may be amended and potentially adversely affected as the Funds seek to comply with regulations that apply to the valuation practices of registered investment companies.

Valuations of the Funds' securities and other assets are supplied primarily by independent third-party pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Adviser, with the assistance of the Valuation Committee, convenes monthly, or more frequently as needed, to review the valuation of all assets which have been fair valued. The Adviser, consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly reviews the appropriateness of the inputs, methods, models and assumptions employed by the independent third-party pricing services. If the independent third-party pricing service cannot or does not provide a valuation for a particular investment or such valuation is deemed unreliable, such investment is fair valued by the Adviser.

In general, portfolio securities and assets of a Fund will be valued on the basis of readily available market quotations at their current market value. With respect to portfolio securities and assets of a Fund for which market quotations are not readily available, or deemed unreliable by the Adviser, the Fund will fair value those securities and assets in good faith in accordance with the Valuation Procedures. Valuations in accordance with these methods are intended to reflect each security's (or asset's or liability's) "fair value." Fair value represents a good faith approximation of the value of a security. Fair value determinations may be based on limited inputs and involve the consideration of a number of subjective factors, an analysis of applicable facts and circumstances, and the exercise of judgment. Each such determination is based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to market prices; sale prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics, or based on inputs such as prices of securities with comparable maturities and characteristics, or on inputs such as anticipated cash flows or collateral, spread over U.S. Treasury securities, and other information analysis. As a result, it is possible that the fair value for a security determined in good faith in accordance with the Valuation Procedures may differ from valuations for the same security determined by other funds using their own valuation procedures. Although the Valuation Procedures are designed to value a portfolio security or

asset at the price a Fund may reasonably expect to receive upon its sale in an orderly transaction, there can be no assurance that any fair value determination thereunder would, in fact, approximate the amount that a Fund could reasonably expect to receive upon the sale of the portfolio security or asset.

U.S. Government securities are valued by independent third-party pricing services, using the last traded fill price, or at the reported bid price at the close of business on the valuation date.

Commercial paper and discount notes with a maturity of greater than 60 days at acquisition are valued at prices that reflect broker-dealer supplied valuations or are obtained from independent third-party pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Commercial paper and discount notes with a maturity of 60 days or less at acquisition are valued at amortized cost, unless the Adviser concludes that amortized cost does not represent the fair value of the applicable asset in which case it will be valued using an independent third-party pricing service.

CLOs, CDOs, MBS, ABS, and other structured finance securities are generally valued using an independent third-party pricing service.

Repurchase agreements are generally valued at amortized cost, provided such amounts approximate market value.

Equity securities listed or traded on a recognized U.S. securities exchange or the Nasdaq Stock Market ("NASDAQ") will generally be valued on the basis of the last sale price on the primary U.S. exchange or market on which the security is listed or traded; provided, however, that securities listed on NASDAQ will be valued at the NASDAQ official closing price, which may not necessarily represent the last sale price.

Open-end investment companies are valued at their NAV as of the close of business, on the valuation date. Exchange-Traded Funds and closedend investment companies are generally valued at the last quoted sale price.

Exchange-traded options are valued at the mean of the bid and ask prices on the principal exchange on which they are traded. Over-the-counter ("OTC") options and options on swaps ("swaptions") are valued using a price provided by a pricing service.

Forward foreign currency exchange contracts are valued daily based on the applicable exchange rate of the underlying currency.

Futures contracts are valued on the basis of the last sale price as of 4:00 p.m. on the valuation date. In the event that the exchange for a specific futures contract closes earlier than 4:00 p.m., the futures contract is valued at the official settlement price of the exchange. However, the underlying securities from which the futures contract value is derived are monitored until 4:00 p.m. to determine if fair valuation would provide a more accurate valuation.

Interest rate swap agreements entered into by a Fund are valued on the basis of the last sale price on the primary exchange on which the swap is traded. Other swap agreements entered into by a Fund are generally valued using an evaluated price provided by an independent third-party pricing service.

Typically, loans are valued using information provided by an independent third-party pricing service that uses broker quotes, among other inputs. If the independent third-party pricing service cannot or does not provide a valuation for a particular loan, or such valuation is deemed unreliable, such investment is valued based on a quote from a broker-dealer or is fair valued by the Adviser. Funds that invest in loans or asset-backed securities as part of their investment strategies may have a significant amount of these instruments that are fair valued by the Adviser.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the New York Stock Exchange ("NYSE"). The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currencies are valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. Investments in foreign securities may involve risks not present in domestic investments. The Adviser will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: the value of the securities traded on other foreign markets, American Depositary Receipts ("ADR") trading,

closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities. In addition, under the Valuation Procedures, the Adviser is authorized to use prices and other information supplied by a third-party pricing vendor in valuing foreign securities.

A Fund may also fair value securities and assets when a significant event is deemed to have occurred after the time of a market quotation including for securities and assets traded on foreign markets and securities and assets for which market quotations are provided by independent third-party pricing services as of a time that is prior to the time when the Funds determine their NAV. There can be no assurance in each case that significant events will be identified.

Valuations of the Funds' securities and other assets are supplied primarily by independent third-party pricing services pursuant to the processes set forth in the Valuation Designee Procedures. Valuations provided by the independent third-party pricing services are generally based on methods designed to approximate the amount that a Fund could reasonably expect to receive upon the sale of the portfolio security or asset. When providing valuations to the Funds, independent third-party pricing services use various inputs, methods, models and assumptions, which may include information provided by broker-dealers and other market makers. Independent third-party pricing services face the same challenges as the Funds in valuing securities and assets and may rely on limited available information. If the independent third-party pricing service cannot or does not provide a valuation for a particular investment, or such valuation is deemed unreliable, such investment is fair valued by the Adviser. A Fund may also use third-party service providers to model certain securities to determine fair market value. While a Fund's use of fair valuation is intended to result in calculation of NAV that fairly reflects values of the Fund's portfolio securities as of the time of pricing, a Fund cannot guarantee that any fair valuation will, in fact, approximate the amount the Fund would actually realize upon the sale of the securities in question.

Quotes from broker-dealers (i.e., prices provided by a broker-dealer or other market participant, which may or may not be committed to trade at that price), adjusted for fluctuations in criteria such as credit spreads and interest rates, may also be used to value a Fund's assets. Quotes from broker-dealers and vendor prices based on broker quotes can vary in terms of depth (e.g., provided by a single broker-dealer) and frequency (e.g., provided on a daily, weekly, or monthly basis, or any other regular or irregular interval). Although quotes from broker-dealers and vendor prices based on broker quotes are typically received from established market participants, a Fund may not have the transparency to view the underlying inputs which support such quotes. Significant changes in a quote from a broker-dealer would generally result in significant changes in the fair value of the security.

### (b) U.S. Government and Agency Obligations

Certain U.S. Government and Agency Obligations are traded on a discount basis; the interest rates shown on the Funds' Schedules of Investments reflect the effective rates paid at the time of purchase by the Funds. Other securities bear interest at the rates shown, payable at fixed dates through maturity.

Inflation-indexed bonds are fixed-income securities whose principal value is periodically adjusted to the rate of inflation. The interest rate on these securities is generally fixed at issuance at a rate lower than typical bonds. Over the life of an inflation-indexed bond however, interest will be paid based on a principal value which is adjusted for inflation. Any increase in the principal amount of an inflation-indexed bond is recognized as a component of interest on the Funds' Statements of Operations, even though principal is not received until maturity.

### (c) Senior Floating Rate Interests and Loan Investments

Senior floating rate interests in which the Trust invests generally pay interest rates which are periodically adjusted by reference to a base shortterm floating rate, plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, (ii) the prime rate offered by one or more major United States banks, or (iii) the bank's certificate of deposit rate. Senior floating rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The rate at which the borrower repays cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities disclosed in the Funds' Schedules of Investments.

The Funds invest in loans and other similar debt obligations ("obligations"). A portion of the Funds' investments in these obligations is sometimes referred to as "covenant lite" loans or obligations ("covenant lite obligations"), which are obligations that lack financial maintenance covenants or possess fewer or contingent financial maintenance covenants and other financial protections for lenders and investors. The Funds may also obtain exposure to covenant lite obligations through investment in securitization vehicles and other structured products. Many new, restructured or reissued obligations have not featured traditional covenants, which are intended to protect lenders and investors by (i) imposing

certain restrictions or other limitations on a borrower's operations or assets or (ii) providing certain rights to lenders. The Funds may have fewer rights with respect to covenant lite obligations, including fewer protections against the possibility of default and fewer remedies in the event of default. As a result, investments in (or exposure to) covenant lite obligations are subject to more risk than investments in (or exposure to) certain other types of obligations. The Funds are subject to other risks associated with investments in (or exposure to) obligations, including that obligations may not be considered "securities" and, as a result, the Funds may not be entitled to rely on the anti-fraud protections under the federal securities laws and instead may have to resort to state law and direct claims.

# (d) Interest on When-Issued Securities

The Funds may purchase and sell interests in securities on a when-issued and delayed delivery basis, with payment and delivery scheduled for a future date. No income accrues to the Funds on such interests or securities in connection with such transactions prior to the date the Funds actually take delivery of such interests or securities. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Funds will generally purchase these securities with the intention of acquiring such securities, they may sell such securities before the settlement date.

# (e) Short Sales

When a Fund engages in a short sale of a security, an amount equal to the proceeds is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the market value of the short sale.

Fees, if any, paid to brokers to borrow securities in connection with short sales are recorded as interest expense. In addition, the Fund must pay out the dividend rate of the equity or coupon rate of the obligation to the lender and record this as an expense. Short dividend or interest expense is a cost associated with the investment objective of short sales transactions, rather than an operational cost associated with the day-today management of any mutual fund. The Fund may also receive rebate income from the broker resulting from the investment of the proceeds from securities sold short.

# (f) Options

Upon the purchase of an option, the premium paid is recorded as an investment, the value of which is marked-to-market daily. If a purchased option expires, the Fund realizes a loss in the amount of the cost of the option. When the Fund enters into a closing sale transaction, it realizes a gain or loss depending on whether the proceeds from the closing sale transaction are greater or less than the cost of the option. If the Fund exercises a put option, it realizes a gain or loss from the sale of the underlying security and the proceeds from such sale will be decreased by the premium originally paid. When the Fund exercises a call option, the cost of the security purchased by the Fund upon exercise increases by the premium originally paid.

When the Fund writes (sells) an option, an amount equal to the premium received is entered in that Fund's accounting records as an asset and equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current value of the option written. When a written option expires, or if the Fund enters into a closing purchase transaction, it realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the option was sold).

The Fund may purchase and write swaptions primarily to preserve a return or spread on a particular investment or portion of the Funds' holdings, as a duration management technique or to protect against an increase in the price of securities it anticipates purchasing at a later date. The purchaser and writer of a swaption is buying or granting the right to enter into a previously agreed upon interest rate swap agreement at any time before the expiration of the options. The swaptions are forward premium swaptions which have extended settlement dates.

### (g) Futures Contracts

Upon entering into a futures contract, a Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is affected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized appreciation or depreciation. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

### (h) Swap Agreements

Swap agreements are marked-to-market daily and the change, if any, is recorded as unrealized appreciation or depreciation. Payments received or made as a result of an agreement or termination of an agreement are recognized as realized gains or losses.

Upon entering into certain centrally-cleared swap transactions, a Fund is required to deposit with its clearing broker an amount of cash or securities as an initial margin. Subsequent variation margin receipts or payments are received or made by the Fund depending on fluctuations in the fair value of the reference entity and are recorded by the Fund as unrealized appreciation or depreciation. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Upfront payments received or made by a Fund on credit default swap agreements and interest rate swap agreements are amortized over the expected life of the agreement. Periodic payments received or paid by a Fund are recorded as realized gains or losses. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses.

## (i) Forward Foreign Currency Exchange Contracts

The change in value of a forward foreign currency exchange contract is recorded as unrealized appreciation or depreciation until the contract is closed. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

## (j) Currency Translations

The accounting records of the Funds are maintained in U.S. dollars. All assets and liabilities initially expressed in foreign currencies are converted into U.S. dollars at prevailing exchange rates. Purchases and sales of investment securities, dividend and interest income, and certain expenses are translated at the rates of exchange prevailing on the respective dates of such transactions. Changes in the relationship of these foreign currencies to the U.S. dollar can significantly affect the value of the investments and earnings of the Funds. Foreign investments may also subject the Funds to foreign government exchange restrictions, expropriation, taxation, or other political, social, geopolitical or economic developments, all of which could affect the market and/or credit risk of the investments.

The Funds do not isolate that portion of the results of operations resulting from changes in the foreign exchange rates on investments from the fluctuations arising from changes in the market prices of securities held. Such fluctuations are included with the net realized gain or loss and unrealized appreciation or depreciation on investments.

Reported net realized foreign exchange gains and losses arise from sales of foreign currencies and currency gains or losses realized between the trade and settlement dates on investment transactions. Net unrealized appreciation and depreciation arise from changes in the fair values of assets and liabilities other than investments in securities at the fiscal period end, resulting from changes in exchange rates.

# (k) Foreign Taxes

The Funds may be subject to foreign taxes (a portion of which may be reclaimable) on income, stock dividends, capital gains on investments or certain foreign currency transactions. All foreign taxes are recorded in accordance with the applicable foreign tax regulations and rates that exist in the foreign jurisdictions in which the Funds invest. These foreign taxes, if any, are paid by the Funds and reflected in their Statements of Operations as follows: foreign taxes withheld at source are presented as a reduction of income and foreign taxes on capital gains from sales of investments are included with the net realized gain (loss) on investments. Foreign taxes payable or deferred as of March 31, 2025, if any, are disclosed in the Funds' Statements of Assets and Liabilities.

### (I) Security Transactions

Security transactions are recorded on the trade date for financial reporting purposes. Realized gains and losses from securities transactions are recorded using the identified cost basis. Proceeds from lawsuits related to investment holdings are recorded as a reduction to cost if the securities are still held and as realized gains if no longer held in the respective Fund. Dividend income is recorded on the ex-dividend date, net of applicable taxes withheld by foreign countries, if any. Taxable non-cash dividends are recorded as dividend income. Interest income, including amortization of premiums and accretion of discounts, is accrued on a daily basis. Interest income also includes paydown gains and losses on

mortgage-backed and asset-backed securities and senior and subordinated loans. Amendment fees are earned as compensation for evaluating and accepting changes to the original loan agreement and are recognized when received. Dividend income from Real Estate Investment Trusts ("REITs") is recorded based on the income included in the distributions received from the REIT investments using published REIT classifications, including some management estimates when actual amounts are not available. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to realized gains. The actual amounts of income, return of capital, and realized gains are only determined by each REIT after its fiscal year-end, and may differ from the estimated amounts.

Income from residual collateralized loan obligations is recognized using the effective interest method. At the time of purchase, management estimates the future expected cash flows and determines the effective yield and estimated maturity date based on the estimated cash flows. Subsequent to the purchase, the estimated cash flows are updated periodically and a revised yield is calculated prospectively.

Certain Funds may receive other income from investments in senior loan interests including amendment fees, consent fees and commitment fees. For funded loans, these fees are recorded as income when received by the Funds and included in interest income on the Funds' Statements of Operations. For unfunded loans, commitment fees are included in realized gain on investments on the Funds' Statements of Operations at the end of the commitment period.

## (m) Distributions

The Funds declare dividends from investment income daily. Each Fund pays its shareholders from its net investment income monthly and distributes any net capital gains that it has realized, at least annually. Distributions to shareholders are recorded on the ex-dividend date. Dividends are reinvested in additional shares, unless shareholders request payment in cash. The character of distributions made during the year from net investment income or net realized gains may differ from their ultimate characterization for U.S. federal income tax purposes.

## (n) Class Allocations

Interest and dividend income, most expenses, all realized gains and losses, and all unrealized appreciation and depreciation are allocated across share classes based upon the value of the outstanding shares in each share class. Certain costs, such as distribution and service fees are charged directly to specific share classes. In addition, certain expenses have been allocated to the individual Funds in the Trust based on the respective net assets of each Fund included in the Trust.

# (o) Earnings Credits

Under the fee arrangement with the custodian, the Funds may earn credits based on overnight custody cash balances. These credits are utilized to reduce related custodial expenses. The custodian fees disclosed in the Funds' Statements of Operations are before the reduction in expense from the related earnings credits, if any. Earnings credits for the period ended March 31, 2025, are disclosed in the Funds' Statements of Operations.

# (p) Cash

The Funds may leave cash overnight in their cash account with their custodian. Periodically, a Fund may have cash due to their custodian bank as an overdraft balance. A fee is incurred on this overdraft, calculated by multiplying the overdraft by a rate based on the federal funds rate, which was 4.33% at March 31, 2025.

### (q) Indemnifications

Under the Trust's organizational documents, the Trustees and Officers are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, throughout the normal course of business, the Trust, on behalf of the Funds, Funds enter into contracts that contain a variety of representations and warranties which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds and/or their affiliates that have not yet occurred. However, based on experience, the Funds expect the risk of loss to be remote.

### (r) Special Purpose Acquisition Companies

The Funds may acquire an interest in a special purpose acquisition company ("SPAC") in an initial public offering or a secondary market transaction. SPAC investments carry many of the same risks as investments in initial public offering securities, such as erratic price movements, greater risk of loss, lack of information about the issuer, limited operating and little public or no trading history, and higher transaction costs. An investment in a SPAC is typically subject to a higher risk of dilution by additional later offerings of interests in the SPAC or by other investors exercising existing rights to purchase shares of the SPAC and interests in SPACs may be illiquid and/or be subject to restrictions on resale. A SPAC is a publicly traded company that raises investment capital for the purpose of acquiring the equity securities of one or more existing companies (or interests therein) via merger, combination, acquisition or other similar transactions. Unless and until an acquisition is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. government securities, money market securities and cash and does not typically pay dividends in respect of its common stock. SPAC investments are also subject to the risk that a significant portion of the funds raised by the SPAC may be expended during the search for a target acquisition or merger and that the SPAC may have limited time in which to conduct due diligence on potential business combination targets. Because SPACs are in essence blank check companies without operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. Among other conflicts of interest, the economic interests of the management, directors, officers and related parties of a SPAC can differ from the economic interests of public shareholders, which may lead to conflicts as they evaluate, negotiate and recommend business combination transactions to shareholders. This risk may become more acute as the deadline for the completion of a business combination nears. There is no guarantee that the SPACs in which the Funds invest will complete an acquisition or that any acquisitions that are completed will be profitable.

### Note 2 - Financial Instruments and Derivatives

As part of their investment strategies, the Funds may utilize short sales and a variety of derivative instruments. These investments involve, to varying degrees, elements of market risk and risks in excess of amounts recognized on the Funds' Statements of Assets and Liabilities. Valuation and accounting treatment of these instruments can be found under Significant Accounting Policies in Note 1 of these Notes to Financial Statements.

### **Short Sales**

A short sale is a transaction in which a Fund sells a security it does not own. If the security sold short decreases in price between the time the Fund sells the security and closes its short position, the Fund will realize a gain on the transaction. Conversely, if the security increases in price during the period, the Fund will realize a loss on the transaction. The risk of such price increases is the principal risk of engaging in short sales.

#### Derivatives

Derivatives are instruments whose values depend on, or are derived from, in whole or in part, the value of one or more other assets, such as securities, currencies, commodities or indices. Derivative instruments may be used for investment purposes (including to maintain cash reserves while maintaining exposure to certain other assets), for risk management (hedging) purposes, to facilitate trading, to reduce transaction costs and to pursue higher investment returns. Derivative instruments may also be used to seek to mitigate certain investment risks, such as foreign currency exchange rate risk, interest rate risk and credit risk. U.S. GAAP requires disclosures to enable investors to better understand how and why a Fund uses derivative instruments, how these derivative instruments are accounted for and their effects on the Fund's financial position and results of operations.

The Funds may utilize derivatives for the following purposes:

Duration: the use of an instrument to manage the interest rate risk of a portfolio.

Hedge: an investment made in order to reduce the risk of adverse price movements in a security, by taking an offsetting position to protect against broad market moves.

Income: the use of any instrument that distributes cash flows typically based upon some rate of interest.

Index Exposure: the use of an instrument to obtain exposure to a listed or other type of index.

Leverage: gaining total exposure to equities or other assets on the long and short sides at greater than 100% of invested capital.

If a Fund's investment strategy consistently involves applying leverage, the value of the Fund's shares will tend to increase or decrease more than the value of any increase or decrease in the underlying index or other asset. In addition, because an investment in derivative instruments generally requires a small investment relative to the amount of investment exposure assumed, an opportunity for increased net income is created; but, at the same time, leverage risk will increase. A Fund's use of leverage, through borrowings or instruments such as derivatives, may cause an investment in the Fund to be more volatile and riskier than if the Fund had not been leveraged.

#### **Options Purchased and Written**

A call option on a security gives the purchaser of the option the right to buy, and the writer of a call option the obligation to sell, the underlying security. The purchaser of a put option has the right to sell, and the writer of the put option the obligation to buy, the underlying security at any time during the option period. The risk associated with purchasing options is limited to the premium originally paid.

The following table represents the Funds' use and volume of call/put options purchased on a monthly basis:

		Average	Notional Amount
Fund	Use	Call	Put
Active INvestment Series (GAINS) - Core Plus Fund Active INvestment Series (GAINS)	Duration, Hedge	\$ 1,543,915	\$ 815,652
- Limited Duration Fund	Duration, Hedge	891,958	361,925
Core Bond Fund	Duration, Hedge	145,486,223	178,700,073
Limited Duration Fund	Duration, Hedge	320,404,500	394,471,333
Macro Opportunities Fund	Duration, Hedge	517,271,046	753,162,980
Total Return Bond Fund	Duration, Hedge	1,852,327,111	2,303,786,637

The risk in writing a call option is that a Fund may incur a loss if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that a Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there may be an imperfect correlation between the movement in prices of options and the underlying securities where a Fund may not be able to enter into a closing transaction because of an illiquid secondary market; or, for OTC options, a Fund may be at risk because of the counterparty's inability to perform.

The following table represents the Funds' use and volume of call/put options written on a monthly basis:

		Average	Notional Amount
Fund	Use	Call	Put
Active INvestment Series (GAINS) - Core Plus Fund Active INvestment Series (GAINS)	Duration, Hedge	\$ 1,543,915	\$ 463,915

## **Futures Contracts**

A futures contract is an agreement to purchase (long) or sell (short) an agreed amount of securities or other instruments at a set price for delivery at a future date. There are significant risks associated with a Fund's use of futures contracts, including (i) there may be an imperfect or no correlation between the changes in market value of the underlying asset and the prices of futures contracts; (ii) there may not be a liquid secondary market for a futures contract; (iii) trading restrictions or limitations may be imposed by an exchange; and (iv) government regulations may restrict trading in futures contracts. When investing in futures, there is minimal counterparty credit risk to a Fund because futures are exchange-traded and the exchange's clearinghouse, as counterparty to all exchange-traded futures, guarantees against default. Cash deposits are shown as segregated cash with broker on the Funds' Statements of Assets and Liabilities; securities held as collateral are noted on the Funds' Schedules of Investments.

#### **Swap Agreements**

A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. When utilizing OTC swaps, a Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying asset declines in value. Certain standardized swaps are subject to mandatory central clearing and are executed on a multi-lateral or other trade facility platform, such as a registered exchange. There is limited counterparty credit risk with respect to centrally-cleared swaps as the transaction is facilitated through a central clearinghouse, much like exchange-traded futures contracts. For a Fund utilizing centrally-cleared swaps, the exchange bears the risk of loss resulting from a counterparty not being able to pay. There is no guarantee that a Fund or an underlying fund could eliminate its exposure under an outstanding swap agreement by entering into an offsetting swap agreement with the same or another party.

Total return swaps involve commitments where single or multiple cash flows are exchanged based on the price of an underlying reference asset (such as an index) for a fixed or variable interest rate. Total return swaps will usually be computed based on the current value of the reference asset as of the close of regular trading on the NYSE or other exchange, with the swap value being adjusted to include dividends accrued, financing charges and/or interest associated with the swap agreement. When utilizing total return swaps, a Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty or if the underlying reference asset declines in value.

The following table represents the Funds' use and volume of total return swaps on a monthly basis:

Macro Opportunities Fund	Duration, Hedge	119,933,469	_
Ultra Short Duration Fund	Income	_	1,813,841

Interest rate swaps involve the exchange by the Funds with another party for their respective commitment to pay or receive a fixed or variable interest rate on a notional amount of principal. Interest rate swaps are generally centrally-cleared, but central clearing does not make interest rate swap transactions risk free.

The following table represents the Funds' use and volume of interest rate swaps on a monthly basis:

Credit default swaps are instruments which allow for the full or partial transfer of third-party credit risk, with respect to a particular entity or entities, from one counterparty to the other. A fund enters into credit default swaps as a "seller" or "buyer" of protection primarily to gain or reduce exposure to the investment grade and/or high yield bond market. A seller of credit default swaps is selling credit protection or assuming credit risk with respect to the underlying entity or entities. The buyer in a credit default swap is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If a credit event occurs, as defined under the terms of the swap agreement, the seller will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. The notional amount reflects the maximum potential amount the seller of credit protection could be required to pay to the buyer if a credit event occurs. The seller of protection receives periodic premium payments from the buyer and may also receive or pay an upfront premium adjustment to the stated periodic payments. In the event a credit default occurs on a credit default swap referencing an index, a factor adjustment will take place and the buyer of protection will receive a payment reflecting the par less the default recovery rate of the defaulted index component based on its weighting in the index. If no default occurs, the counterparty will pay the stream of payments and have no further obligations to the fund selling the credit protection. For a fund utilizing centrally cleared credit default swaps, the exchange bears the risk of loss resulting from a counterparty not being able to pay. For OTC credit default swaps, a fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty, or in the case of a credit default swap in which a fund is selling credit protection, the default of a third party issuer.

The quoted market prices and resulting market values for credit default swap agreements on securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

## Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract is an agreement between two parties to exchange two designated currencies at a specific time in the future. Certain types of contracts may be cash settled, in an amount equal to the change in exchange rates during the term of the contract. The contracts can be used to hedge or manage exposure to foreign currency risks with portfolio investments or to gain exposure to foreign currencies.

The market value of a forward foreign currency exchange contract changes with fluctuations in foreign currency exchange rates. Furthermore, the Funds may be exposed to risk if the counterparties cannot meet the contract terms or if the currency value changes unfavorably as compared to the U.S. dollar.

The following table represents the Funds' use and volume of forward foreign currency exchange contracts on a monthly basis:

Change in Unrealized Appreciation (Depreciation) on Derivative Investments Recognized on the Statements of Operations

In conjunction with short sales and the use of derivative instruments, the Funds are required to maintain collateral in various forms. Depending on the financial instrument utilized and the broker involved, the Funds use margin deposits at the broker, cash and/or securities segregated at the custodian bank, discount notes or repurchase agreements allocated to the Funds as collateral.

The Trust has established counterparty credit guidelines and enters into transactions only with financial institutions rated/identified as investment grade or better. The Trust monitors the counterparty credit risk associated with each such financial institution.

## **Foreign Investments**

There are several risks associated with exposure to foreign currencies, foreign issuers and emerging markets. A Fund's indirect and direct exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. dollar, or in the case of short positions, that the U.S. dollar will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the U.S. or abroad. In addition, the Funds may incur transaction costs in connection with conversions between various currencies. The Funds may, but are not obligated to, engage in currency hedging transactions, which generally involve buying currency forward, options or futures contracts. However, not all currency risks may be effectively hedged, and in some cases the costs of hedging techniques may outweigh expected benefits. In such instances, the value of securities denominated in foreign currencies can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar.

The Funds may invest in securities of foreign companies directly, or in financial instruments, such as ADRs and exchange-traded funds, which are indirectly linked to the performance of foreign issuers. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. Investing in securities of foreign companies directly, or in financial instruments that are indirectly linked to the performance of foreign issuers, may involve risks not typically associated with investing in U.S. issuers. The value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally

have less trading volume and less liquidity than U.S. markets, and prices in some foreign markets may fluctuate more than those of securities traded on U.S. markets. Many foreign countries lack accounting and disclosure standards comparable to those that apply to U.S. companies, and it may be more difficult to obtain reliable information regarding a foreign issuer's financial condition and operations. Transaction costs and costs associated with custody services are generally higher for foreign securities than they are for U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries portions of these taxes are recoverable, the non-recovered portion will reduce the income received by the Funds.

## Note 3 – Offsetting

In the normal course of business, the Funds enter into transactions subject to enforceable master netting arrangements or other similar arrangements. Generally, the right to offset in those agreements allows the Funds to counteract the exposure to a specific counterparty with collateral received from or delivered to that counterparty based on the terms of the arrangements. These arrangements provide for the right to liquidate upon the occurrence of an event of default, credit event upon merger or additional termination event.

In order to better define their contractual rights and to secure rights that will help the Funds mitigate their counterparty risk, the Funds may enter into an International Swaps and Derivatives Association, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement with their derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between a fund and a counterparty that governs OTC derivatives, including foreign exchange contracts, and typically contains, among other things, collateral posting terms and netting provisions in the event of a default and/or termination event. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out netting) or similar event, including the bankruptcy or insolvency of the counterparty.

For derivatives traded under an ISDA Master Agreement, the collateral requirements are typically calculated by netting the mark-to-market amount for each transaction under such agreement and comparing that amount to the value of any collateral currently pledged by the Funds and the counterparty. For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Funds and cash collateral received from the counterparty, if any, are reported separately on the Funds' Statements of Assets and Liabilities as segregated cash with broker/ receivable for variation margin, or payable for swap settlement/variation margin. Cash and/or securities pledged or received as collateral by the Funds in connection with an OTC derivative subject to an ISDA Master Agreement generally may not be invested, sold or rehypothecated by the counterparty or the Funds, as applicable, absent an event of default under such agreement, in which case such collateral generally may be applied towards obligations due to and payable by such counterparty or the Funds, as applicable. Generally, the amount of collateral due from or to a counterparty must exceed a minimum transfer amount threshold (e.g., \$300,000) before a transfer is required to be made. To the extent amounts due to the Funds from their counterparties are not fully collateralized, contractually or otherwise, the Funds bear the risk of loss from counterparty nonperformance. The Funds attempt to mitigate counterparty risk by only entering into agreements with counterparties that they believe to be of good standing and by monitoring the financial stability of those counterparties.

For financial reporting purposes, the Funds do not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Funds' Statements of Assets and Liabilities.

The following tables present derivative financial instruments and secured financing transactions that are subject to enforceable netting arrangements:

## Note 4 – Fair Value Measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Funds would receive to sell an investment or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a three-tier fair value hierarchy based on the types of inputs used to value assets and liabilities and requires corresponding disclosure. The hierarchy and the corresponding inputs are summarized below:

- Level 1 unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 significant other observable inputs (for example quoted prices for securities that are similar based on characteristics such as interest rates, prepayment speeds, credit risk, etc.).

Level 3 — significant unobservable inputs based on the best information available under the circumstances, to the extent observable inputs are not available, which may include assumptions.

Rule 2a-5 sets forth a definition of "readily available market quotations," which is consistent with the definition of a Level 1 input under U.S. GAAP. Rule 2a-5 provides that "a market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable."

Securities for which market quotations are not readily available must be valued at fair value as determined in good faith. Accordingly, any security priced using inputs other than Level 1 inputs will be subject to fair value requirements. The types of inputs available depend on a variety of factors, such as the type of security and the characteristics of the markets in which it trades, if any. Fair valuation determinations that rely on fewer or no observable inputs require greater judgment. Accordingly, fair value determinations for Level 3 securities require the greatest amount of judgment.

Independent third-party pricing services are used to value a majority of the Funds' investments. When values are not available from an independent third-party pricing service, they will be determined using a variety of sources and techniques, including: market prices; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable maturities and characteristics or based on inputs such as anticipated cash flows or collateral, spread over U.S. Treasury securities, and other information and analysis. A significant portion of the Funds' assets and liabilities are categorized as Level 2, as indicated in this report.

Quotes from broker-dealers, adjusted for fluctuations in criteria such as credit spreads and interest rates, may also be used to value the Funds' assets and liabilities, i.e. prices provided by a broker-dealer or other market participant who has not committed to trade at that price. Although quotes are typically received from established market participants, the Funds may not have the transparency to view the underlying inputs which support the market quotations. Significant changes in a quote would generally result in significant changes in the fair value of the security.

Certain fixed income securities are valued by obtaining a monthly quote from a broker-dealer, adjusted for fluctuations in criteria such as credit spreads and interest rates.

Certain loans and other securities are valued using a single daily broker quote or a price from an independent third-party pricing service based on a single daily or monthly broker quote.

The inputs or methodologies selected and applied for valuing securities or other assets are not necessarily an indication of the risk associated with investing in those securities. The suitability, appropriateness and accuracy of the techniques, methodologies and sources employed to determine fair valuation are periodically reviewed and subject to change.

#### Note 5 - Investment Advisory Agreement and Other Agreements

Under the terms of an investment advisory contract between the Trust, on behalf of the Funds, and the Adviser, the Funds pay GI investment advisory fees on a monthly basis calculated daily at the annualized rates below, based on the average daily net assets of the Funds:

Fund	Management Fees (as a % of Net Assets)
Core Bond Fund	0.39%
Floating Rate Strategies Fund	0.65%*
High Yield Fund	0.60%
Limited Duration Fund	0.39%
Macro Opportunities Fund	0.89%**
Municipal Income Fund	0.50%
Total Return Bond Fund	0.39%
Ultra Short Duration Fund	0.25%

\* Floating Rate Strategies Fund pays GI investment advisory fees on a monthly basis calculated daily at an annualized rate of 0.65% of the average daily net assets of the Fund up to \$5 billion; and 0.60% of the average daily net assets in excess of \$5 billion.

\*\* Macro Opportunities Fund pays GI investment advisory fees on a monthly basis calculated daily at an annualized rate of 0.89% based on the average daily net assets of the Fund up to \$5 billion; and 0.84% on average daily net assets in excess of \$5 billion.

GI has contractually agreed to waive the management fee it receives from each Subsidiary in an amount equal to the management fee paid to GI by the Subsidiary. This undertaking will continue in effect for so long as the Funds invest in the Subsidiary, and may not be terminated by GI unless GI obtains the prior approval of the Funds' Board for such termination. Fees waived under this arrangement are not subject to reimbursement to GI. For the period ended March 31, 2025, the Macro Opportunities Fund waived \$56,470 related to advisory fees in its Subsidiary.

GI pays operating expenses on behalf of the Trust, such as audit and accounting related services, legal services, custody, printing and mailing, among others, on a pass-through basis. Such expenses are allocated to various Funds within the complex based on relative net assets.

The Board has adopted Distribution Plans related to the offering of Class A, Class C and Class P shares pursuant to Rule 12b-1 under the 1940 Act. The plans provide for payments at an annual rate of 0.25% of the average daily net assets of the Fund's Class A and Class P shares, and 1.00% of the average daily net assets of the Fund's Class C shares.

The investment advisory contract for the Funds provides that the total expenses be limited to a percentage of average net assets for each class of shares, exclusive of brokerage costs, dividends or interest on securities sold short, expenses of other investment companies in which a Fund invests, interest, taxes, litigation, indemnification and extraordinary expenses. The limits are listed below:

GPIM has contractually agreed through February 1, 2026, to reimburse expenses to the extent necessary to limit the ordinary operating expenses (including distribution (12b-1) fees (if any), but exclusive of brokerage costs, dividends on securities sold short, acquired fund fees and expenses, interest, taxes, litigation, indemnification, and extraordinary expenses) of the Active INvestment Series (GAINS) - Core Plus Fund

and the Active INvestment Series (GAINS) - Limited Duration Fund to the annual percentage of average daily net assets for SMA Class shares to 0.00%. The agreement will expire when it reaches its termination or when GPIM ceases to serve as the Investment Adviser and it can be terminated by the Fund's Board of Trustees.

GI is entitled to reimbursement by the Funds, excluding Active INvestment Series (GAINS) - Core Plus Fund and Active INvestment Series (GAINS) - Limited Duration Fund, for fees waived or expenses reimbursed during any of the previous 36 months, beginning on the date of the expense limitation agreement, if on any day the estimated operating expenses are less than the indicated percentages. For purposes of this arrangement, GI is entitled to recoupment of previously waived fees or reimbursed expenses for 36 months from the date of the waiver or reimbursement by GI. At March 31, 2025, the amount of fees waived or expenses reimbursed that are subject to recoupment and will expire during the years ended September 30, are presented in the following table:

For the period ended March 31, 2025, GI recouped amounts from the Funds as follows:

Core Bond Fund Floating Rate Strategies Fund Limited Duration Fund	\$ 5,644 5,029 42,872
Macro Opportunities Fund	170,815
Total Return Bond Fund Ultra Short Duration Fund	43,937 27,977

If a Fund invests in a fund that is advised by the same adviser or an affiliated adviser, the investing Fund's adviser has agreed to waive fees at the investing fund level to the extent necessary to offset the proportionate share of any management fee paid by the Fund with respect to its investment in such affiliated fund. Fee waivers will be calculated at the investing fund level without regard to any expense cap in effect for the investing fund. Fees waived under this arrangement are not subject to reimbursement to GI. For the period ended March 31, 2025, the following Funds waived fees related to investments in affiliated funds:

Fund	Amo	ount Waived
Limited Duration Fund	\$	41,512
Macro Opportunities Fund		379,644
Total Return Bond Fund		294,131

For the period ended March 31, 2025, GFD retained sales charges of \$122,316 relating to sales of Class A shares of the Trust.

Certain trustees and officers of the Trust are also officers of GI and/or GFD. The Trust does not compensate its officers or trustees who are officers, directors and/or employees of GI or GFD.

MUFG Investor Services (US), LLC ("MUIS") serves as the Funds' administrator, transfer agent and accounting agent. As administrator, transfer agent and accounting agent, MUIS maintains the books and records of the Funds' securities and cash. The Bank of New York Mellon Corp. ("BNY") serves as the Funds' custodian. As custodian, BNY is responsible for the custody of the Funds' assets. For providing the aforementioned administrative and accounting services, MUIS is entitled to receive a monthly fee equal to a percentage of the Funds' average daily net assets and out of pocket expenses. For providing the aforementioned transfer agent and custodian services, MUIS and BNY are entitled to receive a monthly fee based on the number of transactions during the month and the number of accounts under management, subject to certain minimum monthly fees, and out of pocket expenses.

At March 31, 2025, GI and its affiliates owned over twenty percent of the outstanding shares of the Funds, as follows:

Fund	Percent of Outstanding Shares Owned
Active INvestment Series (GAINS) - Limited Duration Fund	83%
Ultra Short Duration Fund	35%

## Note 6 - Reverse Repurchase Agreements

Each of the Funds may enter into reverse repurchase agreements. Under a reverse repurchase agreement, a Fund sells securities and agrees to repurchase them at a particular price at a future date. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, such buyer or its trustee or receiver may receive an extension of time to determine whether to enforce the Fund's obligation to repurchase the securities, and the Fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

For the period ended March 31, 2025, the following Funds entered into reverse repurchase agreements:

Fund	Number of Days Outstanding	Balance at h 31, 2025	age Balance Dutstanding	Average Interest Rate
Active INvestment Series (GAINS) - Core Plus Fund Active INvestment Series (GAINS)	6	\$ *	\$ 335,275	4.62%
- Limited Duration Fund Total Return Bond Fund	4 77	* *	406,299 215,410,448	3.56% 4.57%

\* As of March 31, 2025, the Funds had no open reverse repurchase agreements.

## Note 7 - Federal Income Tax Information

The Funds intend to comply with the provisions of Subchapter M of the Internal Revenue Code, applicable to regulated investment companies and will distribute substantially all taxable net investment income and capital gains sufficient to relieve the Funds from all, or substantially all, federal income, excise and state income taxes. Therefore, no provision for federal or state income tax or federal excise tax is required.

Tax positions taken or expected to be taken in the course of preparing the Funds' tax returns are evaluated to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the "more-likely-than-not" threshold would be recorded as a tax benefit or expense in the current year. Management has analyzed the Funds' tax positions taken, or to be taken, on U.S. federal income tax returns for all open tax years, and has concluded that no provision for income tax is required in the Funds' financial statements. The Funds' U.S. federal income tax returns are subject to examination by the Internal Revenue Service ("IRS") for a period of three years after they are filed.

If a Fund makes a distribution to its shareholders in excess of its current and accumulated "earnings and profits" in any taxable year, the excess distribution will be treated as a return of capital to the extent of each shareholder's basis (for tax purposes) in its shares, and any distribution in excess of basis will be treated as capital gain. A return of capital is not taxable, but it reduces the shareholder's basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable disposition by such shareholder of the shares.

The Macro Opportunities Fund intends to invest up to 25% of its assets in its Subsidiary, which is expected to provide the Fund with exposure to the commodities markets within the limitations of the U.S. federal income tax requirements under Subchapter M of the Internal Revenue Code. The Fund has received a private letter ruling from the IRS that concludes that the income the Fund receives from its Subsidiary will constitute qualifying income for purposes of Subchapter M of the Internal Revenue Code. The Subsidiary will be classified as a corporation for U.S. federal income tax purposes. Foreign corporations, such as the Subsidiary, will generally not be subject to U.S. federal income taxation unless it is deemed to be engaged in a U.S. trade or business. If, during a taxable year, the Subsidiary's taxable losses (and other deductible items) exceed its income and gains, the net loss will not pass through to the Fund as a deductible amount for U.S. federal income tax purposes and cannot be carried forward to reduce future income from the Subsidiary in subsequent years.

At March 31, 2025, the cost of investments for U.S. federal income tax purposes, the aggregate gross unrealized appreciation for all investments for which there was an excess of value over tax cost, and the aggregate gross unrealized depreciation for all investments for which there was an excess of tax cost over value, were as follows:

Macro Opportunities Fund	_	21,000,000
Total Return Bond Fund	3,172,002,581	4,213,732,744

The Funds are permitted to purchase or sell securities from or to certain affiliated funds under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any purchase or sale of securities by a Fund from or to another fund or portfolio that is or could be considered an affiliate by virtue of having a common investment adviser (or affiliated investment advisers), common trustees and/or common officers complies with Rule 17a-7 of the 1940 Act. Further, as defined under these procedures, each transaction is effected at the current market price. For the period ended March 31, 2025, the Funds did not engage in purchases and sales of securities pursuant to Rule 17a-7 of the 1940 Act.

## Note 9 – Unfunded Loan Commitments

Pursuant to the terms of certain loan agreements, certain Funds held unfunded loan commitments as of March 31, 2025. The Funds are obligated to fund these loan commitments at the borrower's discretion.

\* Non-income producing security.

<sup>1</sup> Security has no stated coupon. However, it is expected to receive residual cash flow payments on defined deal dates.

<sup>2</sup> Security is in default of interest and/or principal obligations.

<sup>3</sup> Variable rate security. Rate indicated is the rate effective at March 31, 2025. In some instances, the effective rate is limited by a minimum rate floor or a maximum rate cap established by the issuer. The settlement status of a position may also impact the effective rate indicated. In some cases, a position may be unsettled at period end and may not have a stated effective rate. In instances where multiple underlying reference rates and spread amounts are shown, the effective rate is based on a weighted average.

<sup>4</sup> Security is an interest-only strip.

## Note 11 - Line of Credit

The Trust, along with other affiliated trusts, secured a 364-day committed, \$1,165,000,000 line of credit from Citibank, N.A., which was in place through September 29, 2024, at which time the line of credit was renewed as a 364-day committed, \$1,115,000,000 line of credit. A Fund may draw (borrow) from the line of credit as a temporary measure for emergency purposes, to facilitate redemption requests, or for other short-term liquidity purposes consistent with the Fund's investment objective and program. For example, it may be advantageous for the Fund to borrow money rather than sell existing portfolio positions to meet redemption requests. Fees related to borrowings, if any, vary under this arrangement between the greater of Citibank's "base rate", SOFR plus 1%, or the federal funds rate plus 1/2 of 1%.

The commitment fee that may be paid by the Funds is at an annualized rate of 0.15% of the average daily amount of their allocated unused commitment amount. The commitment fee amount is allocated to the individual Funds based on the respective net assets of each participating Fund and is referenced in the Funds' Statements of Operations under "Line of credit fees". The Funds did not have any borrowings under this agreement as of and for the period ended March 31, 2025.

## Note 12 – Segment Reporting

In this reporting period, the Funds adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the new standard impacted financial statement disclosures only and did not affect the Funds' financial position or the results of their operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed

by the public entity's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The Officers of the Trust, subject to the oversight and supervision of the Board, serve as the CODM for the Funds.

Each of the Funds represents a single operating segment, as the CODM monitors the operating results of each Fund as a whole and each Fund's long-term strategic asset allocation is pre-determined in accordance with the Fund's investment objective which is executed by each Fund's portfolio managers as a team. Each of the Funds uses a variety of investments to execute its investment strategy. Please refer to Note 1 – Organization and Significant Accounting Policies of these Notes to Financial Statements for additional details on the significant accounting policies and investment types used by the Funds. Please refer to each Fund's Schedule of Investments for a breakdown of the types of investments from which each of the Funds generates its returns. Financial information in the form of total returns, expense ratios and changes in net assets resulting from operations, subscriptions and redemptions), which are used by the CODM to assess the segment's performance versus each Fund's comparative benchmarks, among other metrics, and to make resource allocation decisions for each Fund's single segment, is consistent with that presented within the Fund's financial statements. Segment assets are reflected on each Fund's Statement of Assets and Liabilities as "total assets" and significant segment income, expenses, and gain(loss) are listed on each Fund's Statement of Operations.

## Note 13 – Market Risks

The value of, or income generated by, the investments held by the Funds are subject to the possibility of rapid and unpredictable fluctuation, and loss that may result from various factors. These factors include, among others, developments affecting (or perceived to affect) individual companies, or issuers or particular industries, or from broader influences, including real or perceived changes in prevailing interest rates (which may change at any time based on changes in monetary policies and various market and other economic conditions), changes in inflation rates or expectations about inflation rates, deflation, adverse investor confidence or sentiment, general outlook for corporate earnings, changing economic, political (including geopolitical), social or financial market conditions, bank failures, increased instability or general uncertainty, extreme weather, environmental or man-made disasters, or geological events, governmental actions, tariffs (which may be imposed by U.S. and foreign governments) and trade disruptions, public health emergencies (such as the spread of infectious diseases, pandemics and epidemics), debt crises, terrorism, actual or threatened wars or other armed conflicts (such as the conflict in the Middle East and the ongoing Russia-Ukraine conflict and its collateral economic and other effects, including, but not limited to, sanctions and other international trade barriers) or ratings downgrades, and other similar events, each of which may be temporary or last for extended periods. Different sectors, industries and security types may react differently to such developments. Moreover, changing economic, political, geopolitical, social, financial market or other conditions in one country, geographic region or industry could adversely affect the value, yield and return of the investments held by the Funds in a different country, geographic region, economy, industry or market because of the increasingly interconnected global economies and financial markets. The duration and extent of the foregoing types of factors or conditions are highly uncertain and difficult to predict and have in the past, and may in the future, cause volatility and distress in economies and financial markets or other adverse circumstances, which may negatively affect the value of the Funds' investments and performance of the Funds.

## Note 14 - Subsequent Events

The Funds evaluated subsequent events through the date the financial statements are issued and determined there were no material events that would require adjustment to or disclosure in the Funds' financial statements.

## Sector Classification

Information in the "Schedule of Investments" is categorized by sectors using sector-level Classifications defined by the Bloomberg Industry Classification System, a widely recognized industry classification system provider. Each Fund's registration statement has investment policies relating to concentration in specific sectors/industries. For purposes of these investment policies, the Funds usually classify sectors/industries based on industry-level Classifications used by widely recognized industry classification system providers such as Bloomberg Industry Classification System, Global Industry Classification Standards and Barclays Global Classification Scheme.

## **Quarterly Portfolio Schedules Information**

The Trust files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. The Funds' Form N-PORT is available on the SEC's website at https://www.sec.gov. The Funds' complete schedules of securities holdings as of the end of each fiscal quarter will be made available to the public on the SEC's website at www.sec.gov and on our website at www.guggenheiminvestments.com, and will be made available, upon request and without charge, by calling 800.820.0888.

#### Board Considerations Regarding Approval of Investment Advisory Agreement

At a meeting held in person on November 20-21, 2024, the Board of Trustees of Guggenheim Funds Trust (the "Trust"), including the Independent Trustees, unanimously approved an amended and restated investment advisory agreement (the "GPIM Advisory Agreement") with Guggenheim Partners Investment Management, LLC ("GPIM") on behalf of the series of the Trust listed below (each a "Fund" and collectively, the "Funds") for the purpose of transferring to GPIM the duties and responsibilities of Security Investors, LLC ("Security Investors"), as investment advisor to the Funds under the Funds' current investment advisory agreement with Security Investors (the "SI Advisory Agreement"), for the remainder of the current term of the SI Advisory Agreement:

• Guggenheim Core Bond Fund

• Guggenheim High Yield Fund

• Guggenheim Municipal Income Fund

GPIM and Security Investors are each an indirect subsidiary of Guggenheim Partners, LLC, a privately-held, global investment and advisory firm ("Guggenheim Partners"). Guggenheim Partners, Security Investors, GPIM and their affiliates may be referred to herein collectively as "Guggenheim." GPIM and Security Investors are also known as "Guggenheim Investments," the global asset management and investment advisory division of Guggenheim Partners that includes other affiliated investment management businesses.

At a meeting held in person on August 20-21, 2024, Guggenheim had preliminary discussions with the Board regarding the proposed GPIM Advisory Agreement in connection with an internal realignment at Guggenheim to consolidate Guggenheim's fixed-income registered funds under a single investment adviser, GPIM (the "Internal Realignment"). Following those preliminary discussions, independent legal counsel to the Independent Trustees ("Independent Legal Counsel"), on behalf of the Contracts Review Committee of the Board (the "Committee"), consisting solely of the Independent Trustees, submitted formal requests for information to Guggenheim regarding the proposed GPIM Advisory Agreement and the Internal Realignment, and Guggenheim provided information and materials in response to those requests.

At a meeting held in person on November 20, 2024 (the "November Committee Meeting"), the Committee met separately from Guggenheim to consider the proposed GPIM Advisory Agreement. As part of its review process, the Committee was represented by Independent Legal Counsel, from whom the Independent Trustees received separate legal advice and with whom they met separately. Independent Legal Counsel reviewed and discussed with the Committee various key aspects of the Trustees' legal responsibilities relating to the proposed GPIM Advisory Agreement and certain other related contractual arrangements. Counsel to the Trust ("Fund Counsel") also provided a legal opinion to the Board, advising that the proposed GPIM Advisory Agreement and the Internal Realignment should not be deemed to constitute an "assignment" for purposes of the Investment Company Act of 1940, as amended, and should not require approval by shareholder vote. In addition, Guggenheim discussed the proposed GPIM Advisory Agreement and the Internal Realignment at the November 20-21, 2024 Board meeting. The Committee reviewed and considered the various information and materials provided by Guggenheim and Fund Counsel.

The Committee considered Guggenheim's rationale for the proposed GPIM Advisory Agreement and the Internal Realignment, noting Guggenheim's statement that the proposal to consolidate its fixed-income registered funds under a single adviser will benefit GPIM and Guggenheim to the extent it may eliminate the need for certain intercompany arrangements and simplify certain internal financial accounting and allocation processes. The Committee also considered Guggenheim's belief that the proposal is consistent with the best interests of each Fund. The Committee noted Guggenheim's statement that GPIM and Security Investors operate as a single entity, rather than as separate entities with distinct operations and capabilities, and have access to the same personnel, information and other resources. In addition, the Committee considered that Guggenheim had agreed to pay any legal and Board costs associated with the consideration and implementation of the GPIM Advisory Agreement and that the Funds would not bear any costs or expenses in connection with the proposal.

The Committee noted that the Board, including the Independent Trustees, last approved the renewal of the SI Advisory Agreement for each Fund for an additional annual term at a meeting held in person on May 20-21, 2024. The Committee noted that in connection with such approval the Board had concluded for each Fund, based on the information and materials provided by Guggenheim in connection with the 2024 contract review process (the "2024 Contract Review Materials"), that the investment advisory fees are fair and reasonable in light of the extent and quality of the services provided and other benefits received and that the renewal of the SI Advisory Agreement was in the best interest of each Fund.

In reviewing the proposed GPIM Advisory Agreement for each Fund, the Committee considered that the sole purpose of the proposed GPIM Advisory Agreement is to transfer investment adviser duties and responsibilities for each Fund from Security Investors to GPIM in connection with the Internal Realignment. In this regard, the Committee noted Guggenheim's representations with respect to each Fund indicating that, under the proposed GPIM Advisory Agreement: (1) the Fund's contractual investment advisory fee would not change; (2) Guggenheim does not

expect that the Fund will experience any material changes in its expenses; (3) Guggenheim does not expect any changes in the overall nature, extent and quality of the services provided to the Fund; (4) because the investment advisers that comprise Guggenheim Investments, including GPIM and Security Investors, effectively function as a single asset manager, the day-to-day management of the Fund would not change and there would be no changes to the Fund's portfolio managers; (5) there are no material differences in the terms of the proposed GPIM Advisory Agreement as compared to the SI Advisory Agreement; and (6) with respect to Guggenheim Municipal Income Fund, its current sub-advisory arrangement with GPIM would be eliminated and GPIM would assume sole responsibility for investment adviser duties and responsibilities. The Committee also noted Guggenheim's statement indicating that, as amended and supplemented by the information and materials provided in connection with the proposed GPIM Advisory Agreement, the Committee and the Board may continue to rely on the 2024 Contract Review Materials in their consideration of the proposed GPIM Advisory Agreement.

Following an analysis and discussion of relevant factors, including those identified above, and in the exercise of its business judgment, the Committee concluded that the proposed investment advisory fees are fair and reasonable in light of the nature, extent and quality of the services expected to be provided and other benefits to be received and that it was in the best interest of each Fund to recommend that the Board approve the GPIM Advisory Agreement for each Fund. In reaching this conclusion, no single factor was determinative or conclusive and each Committee member, in the exercise of their informed business judgment, may afford different weights to different factors.

Following its review of the Committee's analysis and determinations, the Board adopted the considerations and conclusions of the Committee and approved the GPIM Advisory Agreement for each Fund.
