Data as of 3.31.2025. Index data source: FactSet. **Performance data quoted represents past performance, which does not guarantee future results.** Current performance may be higher or lower than the performance quoted. Performance data quoted does not include the fund's maximum 5% entry charge or 3% exit charge. Had it been included, the fund's returns would have been lower. Performance shown is net of management fees and operating expenses. The investment return and principal value of an investment in the fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. Returns for periods of less than one year are not annualized. Please note that Class A (Distributing) was fully redeemed between 23 September 2024 and 7 October 2024, and Classes I, W, Z (Accumulating and Distributing) were fully redeemed between 23 September 2024 and 9 October 2024. As a result, during each period, no NAV was calculated for the indicated Classes. For the purpose of performance calculation for the periods during which no NAV was calculated, Guggenheim calculated estimated NAVs for each Class using the historical NAVs of Class A (Accumulating), adjusted for Class specific fees and expenses, as well as for variances between Accumulating and Distributing Classes. Additional information is available upon request.

Please review and give careful consideration to the Fund Prospectus, Supplement, key investor information documents, and Annual Report, which contain important information including investment objectives, risks, information on minimum initial investments for each share class, fees, expenses and other information.

The Multi Credit Composite's official benchmark is ICE BofA 3M Deposit Offered Rate Constant Maturity Index, but for purposes of this presentation it is being compared against ICE BofA 1-3 Month U.S. Treasury Index, the UCITS benchmark. The Fund less than six month old and have limited performance track record. Guggenheim Multi Credit Composite (the "Composite") consists of all of the accounts managed by Guggenheim Investments which have substantially similar investment objectives, policies and strategies as the Fund. The investment results of the Composite are not those of the Fund and are not intended to predict or suggest returns that might be experienced by the Fund or an individual investor having an interest in the Fund. **Please see Important Disclosures at the end of this document for more information about the Composite.**

Past performance does not guarantee future returns. The value of any investment may rise or fall over time. Principal is not guaranteed, and investors may receive less than the full amount of principal invested at the time of redemption if asset values have declined. Individual account performance may be greater than or less than the performance presented for this Composite. Gross returns are presented net of non-reclaimable foreign withholding taxes applicable to U.S. investors and includes the reinvestment of income. Net returns are calculated by reducing Gross returns using annual model fee of 0.50% (Estimated total expense ratio of Global Income Fund Class A). All performance is expressed in U.S. dollars. Performance numbers for time periods greater than one year are annualized. For comparison purposes the Multi Credit Composite is measured against the ICE BofA 3 Month LIBOR Constant Maturity Index. The estimated ongoing charge figure is based on expenses for the twelve month period ended 12.31.2024. Ongoing charges include management fee. This figure may vary from year to year and excludes portfolio transaction costs. 5. The Fund and the benchmark utilize two different credit quality methodologies, which should be taken into account when evaluating the data in order for an adequate comparison. Fund credit quality ratings are measured from AAA (highest) to D (lowest). All securities except those labeled "Not Rated" or "Other" are rated by a Nationally Recognized Statistical Rating Organization (NRSRO). When ratings are available from more than one NRSRO, the highest rating is used. Certain securities not rated by an NRSRO have been assigned an internal rating estimate which is reflected in the breakdown. The benchmark uses the Bloomberg index methodology, which uses the middle rating of Moody's, S&P, and Fitch, or the lowest rating if only two ratings are available.
6. Other includes unratable securities, such as mutual funds, closed-end funds, equities, and derivatives.
7. Average Price excludes zero coupon, interest only and principal only bonds, preferred securities not priced at 100 par, and other alternative sector buckets when applicable.

10. Duration measures a bond's sensitivity to interest rates. Effective duration accounts for a bond's embedded options. The higher the duration, the more a bond's price will drop as rates rise.
11. Spread duration is the sensitivity of the price of a security to changes in its credit spread.
12. The current yield is annualized based on the latest quarterly distribution, which is comprised of income distributions as well as any tax equalization adjustments, if applicable, and is net of on-going charges/expenses. As of 3.31.2025.
