Guggenheim Macro Opportunities Fund Earns Third Consecutive U.S. Lipper Fund Award for Consistent Risk-Adjusted Performance

NEW YORK, NY – March 23, 2017 – Guggenheim Investments, the global asset management and investment advisory business of Guggenheim Partners, tonight announced that Guggenheim Macro Opportunities Fund (GIOIX) has received two prestigious U.S. Lipper Fund Awards. The Fund received 3- and 5-year awards in the Alternative Credit Focus classification to continue its streak of having earned a Lipper Award for every time period in which it has been eligible. The Fund, launched on November 30, 2011, has received three consecutive 3-year awards and now a 5-year award.

Lipper Awards recognize individual mutual funds that have outperformed peers in terms of risk-adjusted, consistent return based on investment results as of November 30, 2016.

“These coveted awards underscore our ongoing commitment to deliver strong risk-adjusted returns for fund shareholders,” said Scott Minerd, Global Chief Investment Officer and Chairman of Investments.

“Our fixed-income portfolios are managed by a systematic, disciplined investment process designed to mitigate behavioral bias and lead to better decision-making. Our investment process is structured to allow the best research and ideas across specialized teams to be brought together and expressed in actively managed portfolios.”

Minerd leads more than 160 fixed-income investment professionals whose responsibilities are segregated into specialized teams based on expertise. Sector teams across the U.S. fixed-income universe, including sectors not included in benchmark bond indices, make specific security selections based on robust, bottom-up, fundamental analysis; Macroeconomic Research and Portfolio Construction Groups independently opine on which sectors have the best relative value; and Portfolio Managers decide which securities best fit a given portfolio in light of its mandate and the top-down sector allocations determined by Portfolio Construction.

“Our philosophy toward actively managed fixed-income is unlike others and our portfolios look very different from benchmarks in terms of design, structure and allocation,” said Anne Walsh, Guggenheim’s Assistant Chief Investment Officer for Fixed Income.

Guggenheim Macro Opportunities Fund is managed by Minerd, Walsh, James Michal, Steve Brown, Adam Bloch and Kevin Gundersen.

Overall, Guggenheim manages more than $155 billion in fixed-income assets.

About Guggenheim Investments

Guggenheim Investments is the global asset management and investment advisory division of Guggenheim Partners, and manages more than $209 billion in assets across fixed income, equity, and alternative strategies. We focus on the return and risk needs of insurance companies, corporate and public pension funds, sovereign wealth funds, endowments and foundations, consultants, wealth
managers, and high-net-worth investors. Our 275+ investment professionals perform rigorous research to understand market trends and identify undervalued opportunities in areas that are often complex and underfollowed. This approach to investment management has enabled us to deliver innovative strategies that provide opportunities for diversification and attractive long-term results.

About Lipper

Lipper, a Thomson Reuters company, is a global leader with a 40-year history of delivering mutual fund information, tools and insights. Their benchmarking and classifications are recognized as the industry standard and are supported by Thomson Reuters – the world’s leading source of intelligent information for businesses and professionals.

About the Lipper Fund Awards

Every year, the U.S. Lipper Fund Awards program honors funds and fund management firms that have excelled in delivering consistently strong risk-adjusted performance, relative to peers, based on Lipper’s proprietary Consistent Return methodology. Lipper scores for Consistent Return reflect funds’ historical risk-adjusted returns relative to funds in the same Lipper classification and include each fund’s expenses and reinvested distributions, and exclude sales charges Consistent Return values are calculated with all eligible share classes for each eligible classification. The highest Lipper Leader for Consistent Return value within each eligible classification determines the fund classification winner over 3, 5, or 10 years.

Past performance is no guarantee of future results.

RISK CONSIDERATIONS

This Fund may not be suitable for all investors. • The Fund’s market value will change in response to interest rate changes and market conditions among other factors. In general, bond prices rise when interest rates fall and vice versa. • The Fund’s exposure to high yield securities may subject the Fund to greater volatility. • The intrinsic value of the underlying stocks in which the Fund invests may never be realized or the stock may decline in value. • When market conditions are deemed appropriate, the Fund may use leverage to the full extent permitted by its investment policies and restrictions and applicable law. Leveraging will exaggerate the effect on net asset value of any increase or decrease in the market value of the Fund’s portfolio. • The use of short selling involves increased risks and costs. You risk paying more for a security than you received from its sale. Theoretically, stocks sold short have the risk of unlimited losses. • The Fund may invest in derivative instruments, which may be more volatile and less liquid, increasing the risk of loss when compared to traditional securities. Certain of the derivative instruments are also subject to the risks of counterparty default and adverse tax treatment. • Instruments and strategies (such as borrowing transactions and reverse repurchase agreements) may provide leveraged exposure to a particular investment, which will magnify any gains or losses on those investments. • Investments in reverse repurchase agreements expose the Fund to the many of the same risks as investments in derivatives. • The Fund’s investments in other investment vehicles subject the Fund to those risks and expenses affecting the investment vehicle. • The Fund’s investments in foreign securities carry additional risks when compared to U.S. securities, due to the impact of diplomatic, political or economic developments in the country in question (investments in emerging markets securities are generally subject to an even greater level of risks). • Investments in syndicated bank loans generally offer a floating interest rate and involve special types of risks. • A highly liquid secondary market may not exist for the commodity-linked structured notes the Fund invests in, and there can be no assurance that a highly liquid secondary market will develop. • The Fund’s exposure to the commodity markets may subject the Fund to greater volatility as commodity-linked investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates or factors affecting a
particular industry or commodity such as droughts, floods, weather, embargos, tariffs and international economic, political and regulatory developments. ● The Fund’s investments in municipal securities can be affected by events that affect the municipal bond market. ● The Fund’s investments in real estate securities subject the Fund to the same risks as direct investments in real estate, which is particularly sensitive to economic downturns. ● The Fund’s investments in restricted securities may involve financial and liquidity risk. ● You may have a gain or loss when you sell your shares. ● It is important to note that the Fund is not guaranteed by the U.S. government. •This Fund is considered nondiversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single security could cause greater fluctuations in the value of fund shares than would occur in a more diversified fund. ● Please read the prospectus for more detailed information regarding these and other risks.

Past performance is no guarantee of future results.
