Certain Information About Distributions

Subject to and qualified in its entirety by the terms of the CCIF 2016 T and CCIF – I prospectuses, the annualized distribution rates displayed herein were calculated by dividing the annualized distributions by the net asset value as of July 26, 2017 for CCIF 2016 T and by dividing the annualized distributions by the current public offering price as of July 26, 2017 for CCIF – I. Regular cash distributions do not include declared special cash or share distributions, if any. The determination of the tax attributes of CCIF 2016 T's and CCIF – I's distributions are made annually as of the end of the applicable fund's fiscal year based upon its taxable income and distributions paid, in each case, for the full year. Therefore, a determination made on a monthly or quarterly basis may not be representative of the actual tax attributes of CCIF 2016 T's and CCIF – I's distributions for a full year. The actual tax characteristics of distributions to shareholders will be reported to shareholders annually on Form 1099-DIV. The payment of future distributions on common shares is subject to the discretion of the Boards of Trustees and applicable legal restrictions and, therefore, there can be no assurance as to the amount or timing of any such future distributions.
