HOW TO ACCESS INDEX

Bloomberg: CLMRCEF<INDEX>

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. Since Inception returns assume a purchase of common shares at each Fund's initial net asset value (NAV) for NAV returns. Returns for periods of less than one year are not annualized. All distributions are assumed to be reinvested either in accordance with the dividend reinvestment plan (DRIP) for NAV returns. All returns include the deduction of management fees, operating expenses, and all other fund expenses, and do not reflect the deduction of brokerage commissions or taxes that investors may pay on distributions or the sale of shares.

Claymore CEF Index®

Investment Objective

The Claymore CEF Index® ("Index") is a 100% rules-based index that is designed to track the performance of a weighted basket of closed-end funds selected based on liquidity, income distribution and market valuation, among other factors. The index follows a modified liquidity weighting methodology developed by Guggenheim Funds Distributors, LLC, and the reconstitution and rebalancing takes place every 367 days. The distributions garnered from the underlying component funds are not reinvested into the index components—the notional shares of the underlying funds will not be increased due to dividends or capital gains distribution. Distributions from each underlying fund are added to the index value as of the close of business on the applicable ex-dividend dates, and the distributions accumulated are subtracted from the index value quarterly.

The index has been licensed to GS Finance Corp. to serve as the basis for the Claymore CEF Index-Linked GS Connect Exchange Traded Notes (NYSE Arca: GCE).

The S-Network Composite Closed-End Fund Index is a rules-based index intended to give investors a means of tracking the overall performance of a global universe of U.S.-listed closed-end funds. The S&P 500® Index is a capitalization weighted index of 500 stocks designed to measure the performance of the broad economy, representing all major industries. These indices are unmanaged and it is not possible to invest directly in these indices.

Historical Closed-End Funds Daily Average Premium/Discount (7.1.2009-3.31.2022)

Historically, closed-end funds have experienced periods of across-the-board market price weakness during periods of market volatility or distress. The Claymore CEF Index® is designed to take advantage of the pricing inefficiencies in the secondary closed-end fund market by screening closed-end funds based on their liquidity, income distribution and market valuation, among other factors.

The chart above illustrates the average premium or discount of all U.S. closed-end funds for a given day and is calculated using a simple average. The chart is for illustrative purposes only and is not meant to forecast, imply or guarantee the future performance of any Guggenheim Investments product. **Past performance does not guarantee future results.** There is no guarantee that the trends and projections noted above will continue or come to fruition and they are subject to change.
