You are about to purchase a product that is not simple and may be difficult to understand.

➤ What is this product?

Type: The Fund is a sub-fund of the Company, a UCITS umbrella investment company.

Term: No fixed term and may be terminated at any time in line with the constitutional documents of the Company.

Objectives: The Fund's investment objective is to seek to provide total return, comprising of income and capital appreciation. The Fund intends to seek to achieve its objective by investing in fixed income securities which are listed, traded or dealt in on Regulated Markets worldwide, with a primary investment focus on developed markets including the U.S.. The Fund can also invest in emerging markets. The Fund will typically invest in traditional fixed income and debt securities such as government and corporate bonds. The Fund may also invest in non-traditional fixed income and debt securities such as loan participations and assignments, asset backed and mortgage-backed securities, preferred stock, zero-coupon bonds, municipal bonds, military housing bonds, payment-in-kind securities (such as payment-in-kind bonds), rule 144A securities and step-up securities (such as step-up bonds). The Fund may also invest up to 10% of its assets in collateralised loan obligations ("CLOs"). The Fund may hold securities of any duration and of any credit quality including unrated and below investment grade securities.

The Fund is actively managed, meaning the Investment Manager will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund. The Fund's performance is measured relative to the ICE BofA 1-3-Month US Treasury Index (the "Index") for comparison purposes only. The Index measures the performance of a single issue of outstanding treasury bill which matures closest to, but not beyond, three months from the rebalancing date. The issue is purchased at the beginning of the month and held for a full month; at the end of the month that issue is sold and rolled into a newly selected issue. The Index does not define the asset allocation of the Fund and depending on market conditions the Fund may deviate significantly from the Index. The Fund is unconstrained by a traditional benchmark and as such can rotate amongst fixed income sectors and securities based on relative value opportunities.

The Fund may also invest in collective investment schemes, transferable securities which are not listed, traded or dealt on a regulated market, cash, and warrants or other forms of restructuring equity or securities, which are received as a result of an in-court or out-of-court financial restructuring or insolvency proceeding, and are issued by the reorganised company post-bankruptcy, sometimes issued together in conjunction with new debt instruments. The warrants in which the Fund may hold may (but are not expected to) include embedded derivatives or leverage. Warrants are not option-like derivative instruments convertible into common shares at a predetermined price. Rather, these are instruments similar to promissory notes used to gain exposure to the underlying security.

The Fund may engage in transactions in financial derivative instruments ("FDI") such as futures, forwards, swaps (including but not limited to total return swaps and credit default swaps), swaptions, options, Securities Financing Transactions including repurchase agreements and reverse repurchase agreements to hedge its investments, gain market exposure and manage the effects of interest rate movements on the Fund's performance and volatility. A swaption is an option on a swap which gives the Fund the right to enter into an interest rate swap at a specified date in the future. Swaptions are contracts whereby one party receives a fee in return for agreeing to enter into a forward swap at a predetermined fixed rate if some contingency event occurs. A reverse repurchase agreement is a transaction whereby a fund purchases securities from a counterparty and simultaneously commits to resell the securities to the counterparty at an agreed upon date and price. A future is a contract, traded on an exchange, to buy or sell an asset at a specified price and on a specific future date. Forwards are similar to futures but are traded with a specific counterparty as opposed to on an exchange. Swaps are agreements between two parties to exchange future payments in one financial asset for payments in another. Swaps must include an exchange of a principal amount at the maturity of or at the inception of the contract. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date.

The Fund may use foreign currency spot transactions for hedging against the base currency of the Fund (including, but not limited to, for managing settlement risk, dividend income and subscription and redemptions in currencies other than the base currency).

The base currency of the Fund is USD.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Investors may redeem their shares (whether in whole or in part) on any dealing day on which retail banks are open for business in Ireland and the US.

Intended retail investor: The Fund is intended for retail investors who can be opted up to professional investors, that are (i) those with knowledge and/or experience of these types of products, (ii) that have obtained appropriate investment advice and (iii) that have the ability to bear losses up to the amount they have invested in the Fund. The Fund will not be suitable for retail investors that are unable to sustain such a long-term and illiquid investment.

Depository: The Fund's assets are held through its Depository, which is The Bank of New York Mellon SA/NV, Dublin Branch.

Distribution type: The Class is accumulating.

➤ What are the risks and what could I get in return?

Risk indicator

Lower risk

Higher risk

1 2 **3** 4 5 6 7

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at www.guggenheiminvestments.com/UCITS.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: USD 10,000		1 year	5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	USD 8,290	USD 7,120
	Average return each year	-17.09%	-6.57%
Unfavourable scenario ¹	What you might get back after costs	USD 8,290	USD 9,730
	Average return each year	-17.09%	-0.55%
Moderate scenario ²	What you might get back after costs	USD 9,660	USD 10,980
	Average return each year	-3.40%	1.88%
Favourable scenario ³	What you might get back after costs	USD 10,810	USD 12,240
	Average return each year	8.06%	4.12%

¹This type of scenario occurred for an investment from 10/2017 to 10/2022.

²This type of scenario occurred for an investment from 08/2019 to 08/2024.

³This type of scenario occurred for an investment from 02/2016 to 02/2021.

➤ What happens if Carne Global Fund Managers (Ireland) Limited is unable to pay out?

The assets and liabilities of the Fund are segregated from those of the PRIIP Manufacturer. The assets of the Fund are held in safekeeping by the Depository. In the event of the insolvency of the PRIIP Manufacturer, the Fund's assets in the safekeeping of the Depository will not be affected. In the event of the insolvency of the Depository, you may suffer financial loss. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

➤ What are the costs?

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

Example Investment: USD 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	USD 928	USD 1,647
Annual cost impact(*)	9.28%	2.89% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.76% before costs and 1.88% after costs.

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year	
One-off costs upon entry or exit	Entry costs	Up to 5.00% of the amount you pay in when entering this investment.	Up to USD 500
	Exit costs	Up to 3.00% of your investment before it is paid out to you.	Up to USD 309
Ongoing costs taken each year	Management fees and other administrative or operating costs	0.79% of the value of your investment per year. This is an estimate based on actual costs over the last year.	USD 79
	Transaction costs	0.40% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	USD 40
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	USD 0

➤ How long should I hold it and can I take my money out early?

The recommended minimum holding period: 5 years.

The recommended holding period is an estimate and must not be taken as a guarantee or an indication of future performance, return or risk levels. You have the right to redeem your shares at their net asset value on any day which banks are normally open for business in Ireland and the US. Redemption requests are subject to the redemption provisions in the Prospectus, including dealing cut-off times. A charge of up to 3 per cent of the Net Asset Value per Share may be payable on redemptions.

➤ How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person advising on the product, complaints can be lodged via the following methods:

E-mail: complaints@carnegroup.com

Mail: 3rd Floor, 55 Charlemont Place, Dublin, D02 F985, Ireland.

➤ Other relevant information

Further Information: We are required to provide you with further documentation, such as the product's latest prospectus and supplement, annual and semi-annual reports. These documents and other product information are available online in English at www.guggenheiminvestments.com/UCITS.

Capitalised terms not otherwise defined in this KID shall have the same meaning as in the prospectus of the Company.

Past Performance and Performance Scenarios: For details of past performance, please see online at www.guggenheiminvestments.com/UCITS. For previous performance scenarios, please see www.guggenheiminvestments.com/UCITS.
