Performance data quoted represents past performance, which does not guarantee future results. Returns may increase or decrease as a result of currency fluctuations. Current performance may be higher or lower than the performance quoted. Performance data quoted does not include the fund's maximum 5% entry charge or 3% exit charge. Had it been included, the fund's returns would have been lower. Performance shown is net of management fees and operating expenses. The investment return and principal value of an investment in the fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. Returns for periods of less than one year are not annualized.

1. This refers to GFI Fund, which is a sub-fund of Guggenheim Global Investments PLC ("GGI"), an open-ended investment company with variable capital constituted as an umbrella Fund with segregated liability between sub funds, authorized and regulated by the Central Bank of Ireland ("CBI") as an Undertaking for Collective Investments in Transferable Securities ("UCITS"). Refer to "Important Information" on the back page. 2. Ratings based on S Class USD (Acc). See page 3 for Morningstar rating disclosure. 3. Please note that the performance data disclosed for these periods reflects Class A USD (Accumulating) prior to the S Class USD (Accumulating) inception date (April 7, 2022) and is included for instructive purposes only. Class A USD (Accumulating) had substantially the same features as Class S USD (Accumulating), including in respect of fees. However, an expense waiver that limited Class A USD (Accumulating) total operating expenses to 0.50% was in effect and is reflected in the A Class USD (Accumulating) performance. A Class USD (Accumulating) terminated in September 2023. 4. The indicated Inception Date of 12.15.2011 is that of A Class USD (Accumulating). The Class S USD (Accumulating) Inception Date was April 7, 2022. Since Inception performance of S Class USD (Accumulating) that solely reflects the annualized performance of that class since April 7, 2022 was 2.53%.

Key Risks The Fund's performance is highly sensitive to credit-default, liquidity, and interest-rate movements. Significant exposure to below-investment-grade corporate bonds, structured credit instruments (including CLOs and asset-backed securities), and non-USD currencies means investors may incur substantial capital losses during periods of market stress, widening credit spreads, or adverse currency moves. These securities can be difficult to sell quickly, and their values may fluctuate more than higher-quality or shorter-duration bonds. Currency hedging, when used, may not eliminate all exchange-rate risk. Investors could receive back less than they invest.

The minimum initial subscription is USD \$2,500. Each share class has different total expense ratios reflecting the operating expenses, management fees, and payments of the Fund. These charges reduce the potential growth and returns of any investment. The total expense ratio figure is based on expenses for the 12-month period ended 12.31.2024. Ongoing charges include management fee. This figure may vary from year to year and excludes portfolio transaction costs. Please review and give careful consideration to the Fund Prospectus, Supplement, key investor information documents, and Annual Report, which contain important information including investment objectives, risks, information on minimum initial investments for each share class, fees, expenses and other information.

The S Class was rated based on its risk-adjusted returns, 3 stars for the Overall, 3 stars for 3-year, 2 stars for 5-year, and 3 stars for 10-year periods among 372, 372, 333, and 206 USD Flexible Bond funds, respectively. The Morningstar Rating for funds, or "star rating," is calculated for managed products with at least a three-year history and does not include the effect of sales charges. Exchange-traded funds and open-end mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

5. Inception date of benchmark and category return is 12.15.2011.
6. Other may include municipals, private placements, military housing bonds, foreign government and agencies, fixed income funds, derivatives, equities and/or other miscellaneous fixed income securities.
7. Net Short-Term Investments includes uninvested cash, net unsettled trades, money market funds, commercial paper, repos, and other liquid short duration.
8. The Fund and the benchmark utilize two different credit quality methodologies, which should be taken into account when evaluating the data in order for an adequate comparison. Fund credit quality ratings are measured from AAA (highest) to D (lowest). All securities except those labeled "Not Rated" or "Other" are rated by a Nationally Recognized Statistical Rating Organization (NRSRO). When ratings are available from more than one NRSRO, the highest rating is used. Certain securities not rated by an NRSRO have been assigned an internal rating estimate which is reflected in the breakdown. The benchmark uses the Bloomberg index methodology, which uses the middle rating of Moody's, S&P, and Fitch, or the lowest rating if only two ratings are available. U.S. Government includes Treasuries, U.S. Agency bonds, and Agency MBS.
9. Other includes unrated securities, such as mutual funds, closed-end funds, equities and derivatives.
10. Average Price excludes zero coupon, interest only and principal only bonds, preferred securities not priced at 100 par, and other alternative sector buckets when applicable.
11. Yield to maturity is an annualized internal rate of return, based on a bond's price and promised cash flows.
12. The weighted average life (WAL) to worst is the average length of time each dollar of unpaid principal on a bond remains outstanding.
13. Option-adjusted spread (OAS) is the measurement of the credit spread of a fixed-income security rate and the risk-free rate of return, which is then adjusted to take into account an embedded option. Measured in basis points (bps). One basis point equals 0.01%.
14. Duration measures a bond's sensitivity to interest rates. Effective duration accounts for a bond's embedded options. The higher the duration, the more a bond's price will drop as rates rise.
15. Spread duration is the sensitivity of the price of a security to changes in its credit spread.
16. The current yield is annualized based on the latest quarterly distribution, which is comprised of income distributions as well as any tax equalization adjustments, if applicable, and is net of on-going charges/expenses. As of 9.30.2025.

Disclosures and Important Information

Risk Considerations Investing in the Core Fixed Income Fund (UCITS) involves material risks, including: (i) Credit Risk – a large allocation to high-yield and non-investment-grade debt can lead to sharp price declines if issuers default or credit spreads widen; (ii) Structured Credit Risk – CLOs, ABS, and non-agency mortgage-backed securities may experience heightened volatility and limited liquidity, especially in stressed markets; (iii) Interest-Rate Risk – the portfolio spread-duration and effective-duration make returns vulnerable to rising rates; (iv) Currency Risk – up to 34 % of assets may be held in non-USD securities, exposing the Fund to exchange-rate fluctuations that hedging may not fully offset; (v) Liquidity Risk – certain securities may not be readily saleable at prevailing prices, potentially forcing sales at unfavorable levels. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Read the fund's prospectus carefully before investing. It contains the fund's investment objectives, risks, charges, expenses, and other information, which should be considered carefully before investing. There is no guarantee of return, and investors may receive back less than their original investment. Please read the prospectus for information on fees, expenses, and holding periods that may apply to each class.

Important Information The fund is a sub-fund of Guggenheim Global Investments PLC ("GGI"), an open-ended investment company with variable capital constituted as an umbrella fund with segregated liability between sub funds, authorized and regulated by the Central Bank of Ireland ("CBI") as an Undertaking for Collective Investments in Transferable Securities ("UCITS").
