

Blue Chip Growth Portfolio, Series 24

Investment Objective

The Blue Chip Growth Portfolio, Series 24 (Trust) seeks to provide total return through capital appreciation and dividend income.

Key Considerations

- **Financially Sound Companies:** The Trust seeks to invest in well-established, financially sound companies with attractive financial and competitive characteristics.
- **Growth Potential:** The Trust seeks to identify blue chip companies which possess superior growth and capital appreciation potential.
- **Reduce Volatility:** Guggenheim believes blue chip growth stocks, which are large-capitalization by definition, may help reduce overall portfolio volatility.

Past performance is no guarantee of future results.

¹The Historical Annual Dividend Distribution (HADD) is as of 11.15.2019 and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

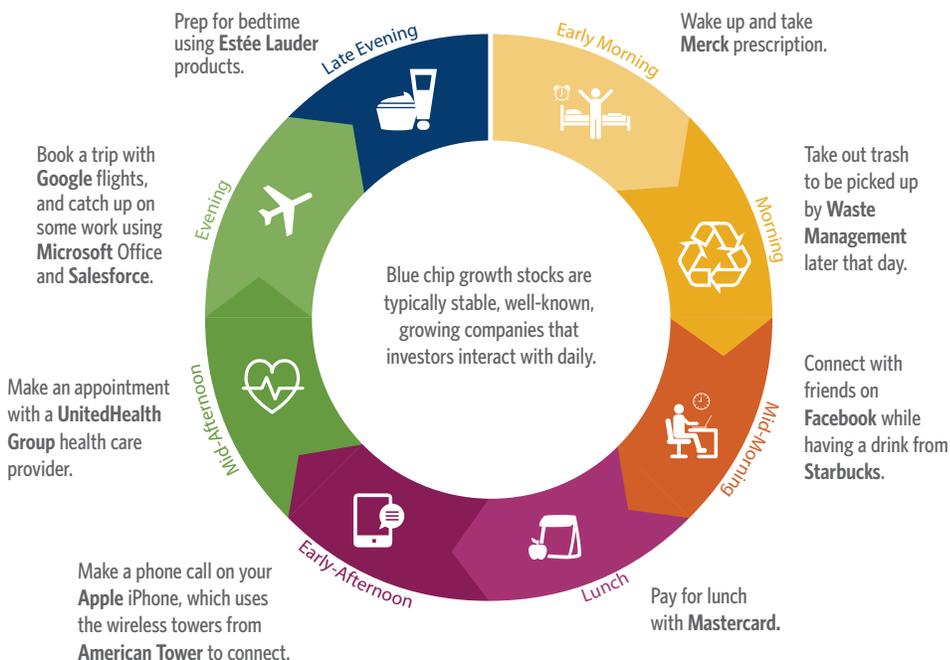

The Blue Chip Growth Advantage

The advantage of blue chip growth stocks resides in the combination of their potential for financial stability and growth. Guggenheim Funds Distributors, LLC seeks stocks of well-established, financially sound, industry leaders with attractive growth characteristics that provide the opportunity for stronger capital appreciation than their peers.

To provide efficient exposure to these more stable growth companies, Guggenheim has created the Blue Chip Growth Portfolio. The Trust utilizes a comprehensive quantitative and qualitative methodology to construct a diversified portfolio of attractively valued U.S. blue chip growth companies that have a history of strong competitive positions, above average growth prospects and consistently high profitability.

The Blue Chip Growth Portfolio, Series 24 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust. • The Trust invests in "growth" stocks. Securities of growth companies may be more volatile than other stocks. If the perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Trust's return. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities. • The Trust is concentrated in the information technology sector. As a result, the factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Furthermore, sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth. • The Trust invests significantly in the consumer products sector. The factors that impact the consumer products sector will likely have a greater effect on this Trust than on a more broadly diversified trust. General risks of companies in the consumer products sector include cyclicalities of revenues and earnings, economic recession, currency fluctuations, changing consumer tastes, extensive competition, product liability litigation and increased government regulation. A weak economy and its

effect on consumer spending would adversely affect companies in the consumer products sector. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
