

Equity & Income Portfolio of CEFs, Series 51

Investment Objective

The Equity & Income Portfolio of CEFs, Series 51 (Trust) seeks to provide total return that is comprised of current income and capital appreciation.

Key Considerations

- **High Income Potential:** The Trust offers the potential for a high level of monthly income within a low yield environment.
- **Opportunity for Discounts:** The Trust consists of funds that are trading at a discount relative to their peers and relative to their long-term average, which may result in higher total return potential.
- **Lower Leverage:** Lower leveraged closed-end funds may experience less volatility from the uncertainty surrounding interest rates. The Trust, based on its underlying holdings, has a relatively low weighted average leverage ratio.¹

¹ Morningstar, 12.2.2021. Average U.S. Listed CEF Universe Leverage Ratio: 28.26 vs Equity & Income Portfolio: 9.96. The Weighted Average Leverage Ratio is the total value of the fund's outstanding leverage presented as a percentage of total leveraged assets.

Advantages of Closed-End Funds

Many closed-end funds are designed to periodically distribute income to shareholders. In addition, closed-end funds have historically traded at a discount to their net asset value and their structure allows for the employment of leverage. These features may help investors realize enhanced total returns.* Other advantages of closed-end funds include:

- Exchange listing
- Price visibility
- Intra-day trading
- Professional management

As a professionally-selected, defined, and fixed portfolio of managed closed-end funds, the Trust may provide an extra degree of diversification for those investors seeking monthly-income potential.**

* There is increased volatility associated with investing in leveraged funds.

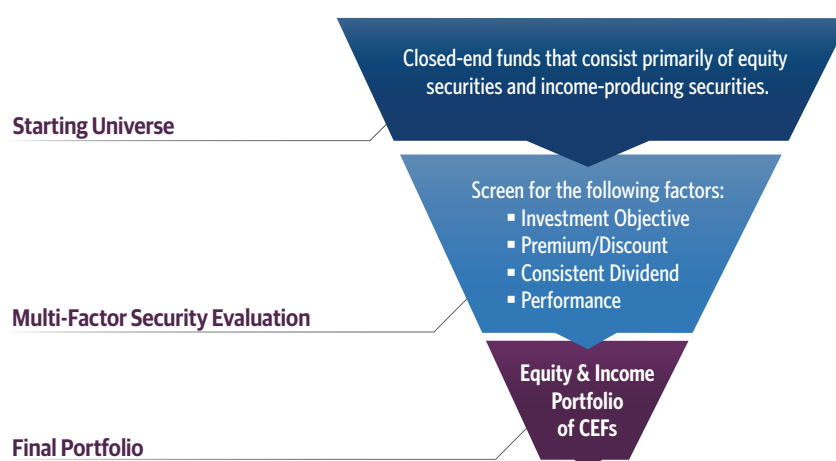

** Despite broad diversification, it is important to note that certain closed-end funds selected for the portfolio invest in bonds rated below investment grade (sometimes referred to as "junk bonds"). These bonds are considered speculative and are traditionally subject to greater credit risk and therefore their risk of default may be greater than normal. As such, it is possible that the income streams provided by these closed-end funds may experience less stability than other investments.

Combining Growth and Income for Enhanced Total Return Potential

For investors seeking to maximize their investment performance, Guggenheim believes it's important to focus on earning total return through both growth and income. The Equity & Income Portfolio of CEFs invests in shares of multiple closed-end funds believed to have the best opportunity to provide both capital appreciation and consistent dividends. When selecting closed-end funds for the Trust, a comprehensive multi-factor security evaluation is used to construct a well-diversified portfolio offering enhanced total return potential.

Security Selection

When selecting closed-end funds for inclusion in the portfolio Guggenheim Funds Distributors, LLC (the Sponsor) looks at numerous factors including, but not limited to:

PORTFOLIO HOLDINGS

Holdings are as of 12.3.2021 and subject to change.

Fee/Cash	40177C700
Fee/Reinvest	40177C718
Ticker	CCEEAX

²The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ³The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing July 2022 and ending September 2022 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ⁴For unit prices other than \$10, percentage of the C&D fee will vary.

The Equity & Income Portfolio of CEFs, Series 51 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • The Trust includes closed-end funds (CEFs), which are subject to various risks, including management's ability to meet the CEF's investment objective and to manage the CEF's portfolio during periods of market turmoil and as investors' perceptions regarding CEFs or their underlying investments change. CEFs are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. CEFs may also employ the use of leverage which increases risk and volatility. • The CEFs are subject to annual fees and expenses, including a management fee. Unitholders of the Trust will bear these fees in addition to the fees

and expenses of the Trust. • Certain CEFs held by the Trust invest in common stocks. Common stock prices fluctuate for several reasons including changes in investors' perceptions of the financial condition of an issuer, changes in the general condition of the relevant stock market, such as the market volatility recently exhibited, or when political or economic events affect the issuers, and may also be sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. • Certain CEFs held by the Trust invest in foreign securities, which presents additional risk. Foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country. • Certain CEFs held by the Trust may invest in securities issued by small- and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • The value of the fixed-income securities in the CEFs will generally fall if interest rates, in general, rise. Typically, fixed-income securities with longer periods before maturity are more sensitive to interest rate changes. The Trust may be subject to greater risk of rising interest rates than would normally be the case due to the current period of historically low rates. • A CEF or an issuer of securities held by a CEF may be unwilling or unable to make principal payments and/or to declare distributions in the future, may call a security before its stated maturity, or may reduce the level of distributions declared. A CEF or an issuer may suspend distributions during the life of the Trust. This may result in a reduction in the value of your units. • The financial condition of a CEF or an issuer of securities held by a CEF may worsen, resulting in a reduction in the value of your units. This may occur at any point in time, including during the primary offering period. • Economic conditions may lead to limited liquidity and greater volatility. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from

various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities.
