

Consumer Innovation Portfolio, Series 6

Investment Objective

The Consumer Innovation Portfolio, Series 6 (Trust) seeks to maximize total return primarily through capital appreciation.

Key Considerations

- **Growth Potential:** Considering that 68 percent of U.S. GDP is driven by consumer spending,¹ the trust's focus on the evolving consumer marketplace may offer attractive growth potential within an overall portfolio.
- **Capitalization on Innovation:** Accelerated by the COVID-19 pandemic, consumer behavior has gone through a metamorphic shift towards more online-focused activity. This trust seeks to offer exposure to companies that are contributing to innovation that directly benefits and impacts customers.
- **Competitive Strength:** The trust seeks to invest in leading companies with strong financials that Guggenheim believes are bringing disruption to their industries.

Portfolio Allocation

Breakdown and weightings are as of 9.18.2023

CAPITALIZATION BREAKDOWN

STYLE BREAKDOWN

Capitalize on the Next Generation of Consumer Opportunities

Consumer behavior has continued to evolve over the past 20 years, but Guggenheim believes that the global pandemic was a tipping point that accelerated both innovation and the adoption of new consumer patterns. Consumers are embracing convenient and contact-free modes of purchasing and payments, as well as finding entertainment in the comfort of their own home. They are adopting ridesharing and work-from-home habits that can be eco-friendly and are likely to exist beyond the COVID-19 era. Consumer spending makes up 68 percent of U.S. GDP,¹ and Guggenheim believes that consumer spending and its evolving nature will be a key growth driver for the U.S. economy.

To enable investors to participate in the potential growth of the evolving consumer marketplace, Guggenheim created the **Consumer Innovation Portfolio**. This trust seeks to invest in companies that Guggenheim believes are disrupting traditional consumption behaviors and are poised to benefit from how innovation is transforming the way consumers live, work, consume and connect.

Key Themes

There are seven identified themes that Guggenheim believes are potential drivers of change and growth in the consumer economy.

 <h3>Digital Payments</h3> <p>Transactions that take place via digital or online modes with no physical exchange of money involved—including digital wallets, peer-to-peer payments and contactless point-of-sale technologies—are considered digital payments.</p>	 <h3>Eco-Friendly Transportation</h3> <p>Eco-friendly transportation is reflective of a long-term shift in consumer mobility towards both electric vehicles over traditional ones and ride hailing services over mass transit and direct car ownership.</p>
 <h3>Gaming</h3> <p>Gaming refers to playing electronic games through consoles, computers, and mobile phones.</p>	 <h3>Media Streaming</h3> <p>Streaming enables consumers to watch movies and TV online or listen to music without the need to download. The pandemic produced a surge in subscribers and revenue, and the next five years should continue to be fueled by growth and original programming.</p>
 <h3>Online Gambling</h3> <p>Online gambling refers to any kind of gambling conducted on the internet rather than in a casino.</p>	 <h3>Online Retail</h3> <p>Online retailing or eCommerce is the sale of goods and services through the internet.</p>
 <h3>Work From Home</h3> <p>Working from home, or telecommuting, was a necessity during the global pandemic. A hybrid model of in-office and work-from-home is likely to persist into the near future.</p>

Reinvest	40177U353
Fee/Cash	40177U361
Fee/Reinvest	40177U379
Ticker	CCNSFX

2 The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in trust expenses or the sale or maturity of securities in the portfolio. **3** The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing April 2024 and ending June 2024 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. **4** For unit prices other than \$10, percentage of the C&D fee will vary.

The Consumer Innovation Portfolio, Series 6 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved.

The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market values of the Trust's securities fluctuate in response to various factors affecting an issuer. Additionally, events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies are impossible to predict and may adversely affect the economy, various markets and issuers, which may negatively impact the performance of the Trust and the Trust's ability to achieve its investment objectives. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust is concentrated in the information technology sector. The factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth. • The Trust is concentrated in the consumer products sector. As a result, the factors that impact the consumer products sector will likely have a greater effect on this Trust than on a more broadly diversified trust. General

risks of companies in the consumer products sector include cyclicalities of revenues and earnings, economic recession, currency fluctuations, changing consumer tastes, extensive competition, product liability litigation and increased government regulation. A weak economy and its effect on consumer spending would adversely affect companies in the consumer products sector. • The Trust invests in innovative companies that may directly benefit and impact consumers. Although the Trust's investment strategy is designed to achieve the Trust's investment objective, the strategy may not prove to be successful. The investment decisions may not produce the intended results and there is no guarantee that the investment objective will be achieved. Companies that are attempting to create new technologies or novel product solutions that may directly benefit and impact consumers may not in fact do so. Additionally, companies that initially develop a novel technology or solution may not be able to capitalize on it. Companies may face political or legal attacks from competitors, industry groups or local and national governments. The Trust may invest in a company that does not currently derive any revenue from innovative consumer technologies or solutions, and there is no assurance that a company will derive any revenue from innovative consumer technologies or solutions in the future. The innovative consumer technology or solution may constitute a small portion of a company's overall business. As a result, the success of an innovative consumer technology or solution may not affect the value of the equity securities issued by the company. • The Trust invests in securities issued by mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors

and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
