

Diversified Dividend & Income Portfolio, Series 35

Investment Objective

The Diversified Dividend & Income Portfolio, Series 35 (Trust) seeks to provide dividend income potential coupled with the potential for long-term capital appreciation.

Key Considerations

- **Diversified Portfolio:** The Trust is a diversified portfolio of domestic equities across all of the major Global Industry Classification Standard (GICS) sectors.²
- **Dividend Sustainability:** Companies that have stable or increasing dividends during times of market volatility may not only offer the potential of rising income, but also may provide stability to an overall investment portfolio.
- **Strong Financials:** Guggenheim believes companies that exhibit strong fundamentals and that have historically distributed significant dividends on a consistent basis generally demonstrate financial strength and positive performance relative to their peers.

¹Morningstar, 8.31.2021.

²Diversification does not ensure a profit nor eliminate the risk of loss.

Dividend Payers: Historical Outperformance with Less Volatility

Guggenheim believes dividends can be an important component of an investment portfolio. They can represent an income source for living expenses or, if reinvested, dividends may have a material impact on a portfolio's total return. Over the last 20 years the impact of reinvested dividends has represented more than 35% of total market return.¹ Also, as shown in the chart below, dividend paying stocks from the S&P 500[®] Index had comparable returns with non-payers but outperformed dividend cutters, while experiencing less volatility.

In recognition of the important role that dividends can play in a portfolio, Guggenheim created the Diversified Dividend & Income Portfolio. The Trust consists of a portfolio of dividend-paying equity securities, diversified across GICS sectors that Guggenheim believes have the ability to sustain future dividends.

Dividend Payers Have Outperformed

Annualized total returns of S&P 500[®] Index stocks by dividend policy (8.31.2001 - 8.31.2021)

...While Experiencing Less Volatility

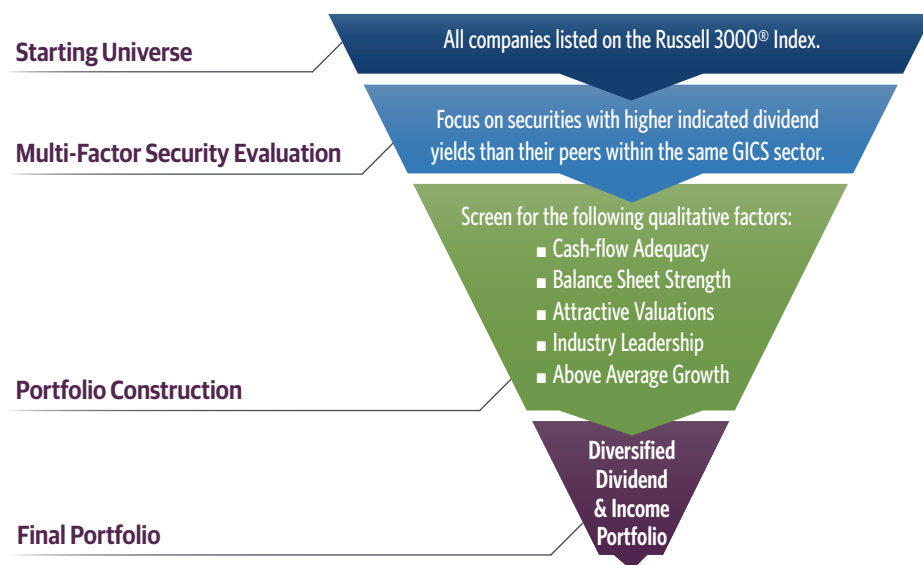

Volatility of S&P 500[®] Index stocks by dividend policy (8.31.2001 - 8.31.2021, as measured by beta)

Past performance is no guarantee of future results. Source: Ned Davis Research. A company's dividend policy is determined by its indicated annual dividend. A stock is classified as a dividend-paying (**All Dividend Payers**) stock if the company indicates that it is going to be paying a dividend within the year. **Dividend Cutters and Eliminators** are defined as companies that have lowered or eliminated their dividend anytime in the last 12 months. Once a decrease occurs, it remains classified as a cutter for 12 months or until another change in dividend policy. A stock is classified as a **Non-Dividend Payer** if the stock's indicated annual dividend is zero. **Beta** is a measure of volatility relative to a benchmark. The benchmark has a beta of 1.0, so if the beta of an investment is 1.1 this means it has historically been 10% more volatile than the benchmark, and a beta of 0.9 would mean the investment has historically been 10% less volatile than the benchmark. Index performance is for illustration purposes only and is not meant to represent any investment product. Returns do not reflect any management fees, transaction costs or expenses. The index is unmanaged and not available for direct investment.

Security Selection

In constructing the Trust's portfolio, the securities were selected based on the following criteria:

Diversified Dividend & Income Portfolio, Series 35

PORTFOLIO SUMMARY

Inception Date	9.7.2021
Termination Date	9.7.2023
Initial Offer Price	\$10.00
Number of Issues	40
Historical Annual Dividend Distribution ³	\$0.2298
Distributions	25th day of each month commencing on 9.25.2021, if any

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C ⁴	\$0.225	2.25%
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.275	2.75%
Fee/Wrap Accounts ⁵		
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.050	0.50%

TICKETING INFORMATION - CUSIPS

Cash	40177B546
Reinvest	40177B553
Fee/Cash	40177B561
Fee/Reinvest	40177B579
Ticker	CDDIJX

³ The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ⁴ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing April 2022 and ending June 2022 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ⁵ For unit prices other than \$10, percentage of the C&D fee will vary.

Index Definitions: The S&P 500® Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization. The Russell 3000® Index, a widely accepted, unmanaged index of U.S. stock market performance, is composed of 3000 large U.S. Companies, as determined by market capitalization.

The Diversified Dividend & Income Portfolio, Series 35 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The trust invests significantly in the financial sector; the factors that impact the financial sector will likely have a greater effect on this trust than on a more broadly diversified trust. The profitability of companies in the financial sector is largely dependent upon the availability and cost of capital which may fluctuate significantly in response to changes in interest rates and general economic developments. Financial sector companies are subject to the adverse effects of economic recession,

decreases in the availability of capital, volatile interest rates, portfolio concentrations in geographic markets and in commercial and residential real estate loans, and competition from new entrants in their fields of business. • The Trust invests in securities issued by small-cap and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
