

Technology Portfolio, Series 27

Investment Objective

The Technology Portfolio, Series 27 (Trust) seeks to maximize total return through capital appreciation.

Key Considerations

- **Solid Fundamentals:** Established technology companies typically have strong balance sheets, excess available cash, few labor union problems, and internationally diverse revenue streams.
- **Shifting Technology Trends:** Many software companies are increasingly adopting subscription-based business models in pursuit of more consistent revenue and cash flow—both of which can be supportive of stock prices.
- **Favorable Growth Prospects:** As the middle class in emerging and developing markets such as China and India continues to grow, Guggenheim believes the demand for technology is likely to rise, potentially spurring industry growth.

The Increased Prominence of the Technology Sector

Companies in the information technology sector demonstrate the ability to continuously bring innovative new products and services to market—regardless of economic conditions. While still innovative, today's largest technology companies have evolved from garage-based upstarts to well-recognized household names upon which we rely daily. Technology's rise to prominence as an established and valued growth sector is evidenced by its status change in the S&P 500® Index's sector composition. As shown in the chart below, the information technology sector's composition has gradually increased more than threefold—from just over 6% in 1990 to its current position of more than 25% of the S&P 500® by market capitalization, making the information technology sector the largest of the GICS (Global Industry Classification Standard) sectors.

The Technology Portfolio selects stocks Guggenheim believes to be core holdings of an IT sector allocation to provide investors access to this attractive growth profile.

Past performance is no guarantee of future results. The chart is for illustrative purposes only; it is not meant to forecast, imply or guarantee the future results of any Guggenheim Investments product. The **S&P 500® Index** is a market-weighted stock market index comprised of the stocks of 500 U.S. corporations. The Index is unmanaged and it is not possible to invest directly in the Index. Source: S&P Dow Jones Indices, 3.31.2020. * As of 9.28.2018, prior to that the sector was Telecommunications. The revised/rename sector incorporates telecommunications and media and entertainment.

CUSIP (fee-reinvest)	40175Y530
Ticker	CTECBX

¹The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ²The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing November 2020 and ending January 2021 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ³For unit prices other than \$10, percentage of the C&D fee will vary.

The Technology Portfolio, Series 27 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. These can include stock market movements, purchases or sales of securities by the Trust, government policies, litigation, and changes in interest rates, inflation, the financial condition of the securities' issuer or even perceptions of the issuer. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Additionally, event such war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to

predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives.

- The Trust is concentrated in the information technology sector. The factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Furthermore, sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth.
- The Trust invests in securities issued by small- and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies.
- Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust.
- The Trust may be susceptible to potential risks through breaches in cybersecurity.
- Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider

their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
