

Technology Portfolio, Series 34

Investment Objective

The Technology Portfolio, Series 34 (Trust) seeks to maximize total return through capital appreciation.

Key Considerations

- **Solid Fundamentals:** Established technology companies typically have strong balance sheets, excess available cash, few labor union problems, and internationally diverse revenue streams.
- **Shifting Technology Trends:** Many software companies are increasingly adopting subscription-based business models in pursuit of more consistent revenue and cash flow—both of which can be supportive of stock prices.
- **Favorable Growth Prospects:** Global technology spending is forecast to grow approximately 4.3% in 2023,² as companies seek to use digital technologies to capture competitive advantages.

CAPITALIZATION BREAKDOWN

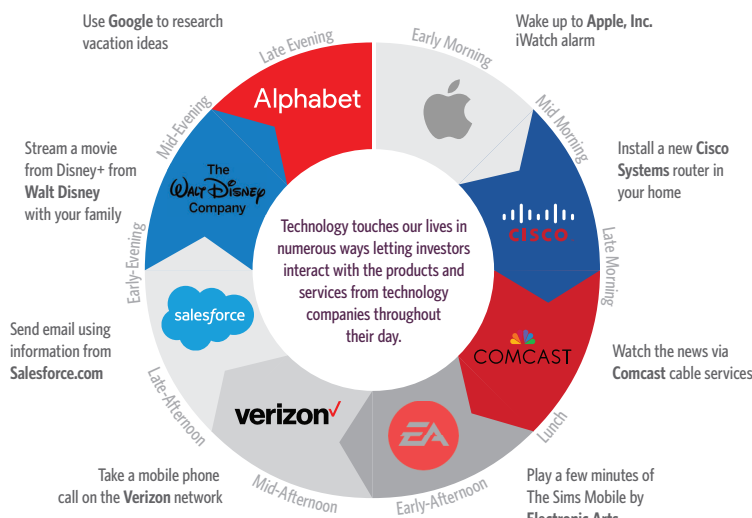

STYLE BREAKDOWN

A Changing World Offers Technology Growth Opportunities

Companies in the information technology sector demonstrate the ability to continuously bring innovative new products and services to market—regardless of economic conditions. Underscoring the importance of this sector, technology is the largest single segment of the market, making up 27% of the S&P 500® Index's sector composition by market capitalization.¹ Technology companies range from large, mature companies, whose products and services are familiar to most investors, to smaller companies that may grow to be tomorrow's giants. The Technology Portfolio offers investors a convenient way to invest in the sector and provides more diversified exposure than purchasing individual tech stocks. Portfolio selection is based on what Guggenheim believes to be core IT holdings that offer the most attractive growth potential, given the current market.

Fee/Reinvest	40177V252
Ticker	CTECIX

³The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ⁴The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing May 2024 and ending July 2024 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ⁵For unit prices other than \$10, percentage of the C&D fee will vary.

The Technology Portfolio, Series 34 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market values of the Trust's securities fluctuate in response to various factors affecting an issuer. Additionally, events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies are impossible to predict and may adversely affect the economy, various markets and issuers, which may negatively impact the performance of the Trust and the Trust's ability to achieve its investment objectives. • The Trust is concentrated in the information technology sector. The factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Furthermore, sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate

in the overall sector growth. • The Trust invests in securities issued by mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult

an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at [GuggenheimInvestments.com](https://www.guggenheiminvestments.com).
