

# Utilities Portfolio, Series 27

## Investment Objective

The Utilities Portfolio, Series 27 (Trust) seeks to provide a high level of income with a secondary objective of capital growth.

## Key Considerations

- **Attractive Income:** In a low interest-rate environment, Guggenheim believes utilities stocks may offer more competitive dividend yields than cyclical stocks.
- **Manage Volatility:** Historically, utilities stocks tend to hold up better than the overall market during periods of market decline.
- **Low Interest Rate Beneficiary:** Due to their large infrastructure costs which require debt financing, a low rate environment benefits utilities by reducing these costs.

## Modernizing the Grid

Modern society depends on utility companies to provide essential services such as electricity and gas in order to function. In addition to upgrading existing infrastructure, there is an increased focus on improving technologies and addressing environmental concerns, spurring the need for capital investment. US electric and gas utility capital expenditures hit an all-time high of approximately \$115 billion in 2016, and capital expenditures are expected to remain substantial.<sup>1</sup> By operating newer infrastructure, utility companies can improve efficiency to generate earnings growth and a rapid return on their investment.

Guggenheim believes investors have long valued the utility sector for its potential to provide above-average levels of income and a high degree of stability. Guggenheim offers the Utilities Portfolio for those seeking exposure to a core holding of utilities stocks and the benefits it may provide to an overall investment portfolio.

## SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C <sup>4</sup>	\$0.225	2.25%
Creation and Development (C&D) Fee	\$0.050	0.50%
<b>Total S/C</b>	<b>\$0.275</b>	<b>2.75%</b>
Fee/Wrap Accounts <sup>5</sup>		
Creation and Development (C&D) Fee	\$0.050	0.50%
<b>Total S/C</b>	<b>\$0.050</b>	<b>0.50%</b>

<sup>4</sup>The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installment on the last business day commencing August 2018 and ending October 2018 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

<sup>5</sup>For unit prices other than \$10, percentage of the C&D fee will vary.

**RISK CONSIDERATIONS:** As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. • The Trust is concentrated in the utilities sector. The factors that impact the utilities sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Adverse developments in this sector may significantly affect the value of your units. Companies involved in the utilities sector must contend with environmental considerations, taxes, government regulation, price and supply fluctuations, competition and energy conservation. • The Trust invests in securities issued by small-capitalization and mid-capitalization companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available,

at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units.
