

Utilities Portfolio, Series 34

Investment Objective

The Utilities Portfolio, Series 34 (Trust) seeks to provide a high level of income with a secondary objective of capital growth.

Key Considerations

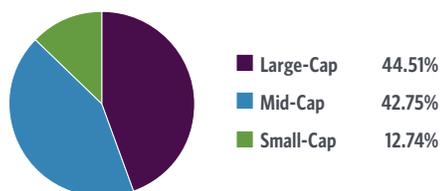

- **Attractive Income:** In a low interest-rate environment, Guggenheim believes utilities stocks have the potential to offer more competitive dividend yields than cyclical stocks. The historical annual dividend distribution for this strategy is \$0.2831,² as of 7.14.2021.
- **Manage Volatility:** Historically, utilities stocks tend to have lower risk than the broader stock market and may help dampen volatility in an investor's overall portfolio.³
- **Defensive Sector.** The utilities sector is classified as a defensive sector because it offers essential services that consumers need regardless of the current stage in the business or economic cycle.

Utilities: A Bright Choice for Dividends and Stability

Modern society depends on utility companies to provide essential services such as electricity and gas in order to function. In addition to upgrading existing infrastructure, there is an increased focus on improving technologies and addressing environmental concerns, spurring the need for capital investment. According to the Edison Electric Institute, 2020 saw a record high in the industry's capital expenditures, and 2021 is projected to rise even higher. One of the principal drivers of this increased spending is investments for grid modernization and system expansion.¹ By operating newer infrastructure, utility companies can improve efficiency to generate earnings growth and a rapid return on their investment.

Guggenheim believes investors have long valued the utility sector for its potential to provide above-average levels of income and a high degree of stability. Guggenheim offers the Utilities Portfolio for those seeking exposure to a core holding of utilities stocks and the benefits it may provide to an overall investment portfolio.

12 MONTH DIVIDEND YIELD OF S&P 500® SECTORS

Past performance is not a guarantee of future results. Source: Bloomberg, 6.30.2021. There is no guarantee that the trends and projections noted above will continue or come to fruition and they are subject to change. Dividend 12 Month Yield Definition: Sum of gross dividend per share amounts that have gone ex-dividend over the prior 12 months, dividend by the current stock price.

²The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio. ⁴The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing February 2022 and ending April 2022 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ⁵For unit prices other than \$10, percentage of the C&D fee will vary.

The Utilities Portfolio, Series 34 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • The Trust is concentrated in the utilities sector. The factors that impact the utilities sector will likely have a

greater effect on this Trust than on a more broadly diversified trust. Adverse developments in this sector may significantly affect the value of your units. Companies involved in the utilities sector must contend with environmental considerations, taxes, government regulation, price and supply fluctuations, competition and energy conservation. • The Trust invests in securities issued by small- and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at

the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions. Such material is not provided in a fiduciary capacity, may not be relied upon for or in connection with the making of investment decisions, and does not constitute a solicitation of an offer to buy or sell securities. All content has been provided for informational or educational purposes only and is not intended to be and should not be construed as legal or tax advice and/or a legal opinion. Always consult a financial, tax and/or legal professional regarding your specific situation.

Read the Trust's prospectus carefully before investing. It contains the Trust's investment objectives, risks, charges, expenses and other information, which should be considered carefully before investing. Obtain a prospectus at GuggenheimInvestments.com.
