

Financials Portfolio, Series 17

Investment Objective

The Financials Portfolio, Series 17 (Trust) seeks to maximize total return primarily through capital appreciation.

Key Considerations

- **Focused Financial Sector Exposure:** Convenient exposure to the financial sector which includes banks, savings-and-loan companies, insurance companies, financial exchanges and financial data providers, investment funds, brokerages, and asset management firms.
- **Dividend Strength:** Financial stocks have increased their dividend each year by nearly 15% on average over the previous ten years.³
- **Fundamentals Reflect Market Conditions:** Relative valuations are lower than historical averages, potentially signaling that revenue difficulties due to a low interest rate environment, are reflected in prices and that financials are poised to recover as the economy improves.⁴

Past performance is not a guarantee of future results. There is no guarantee that the trends and projections noted above will continue or come to fruition and they are subject to change.

Portfolio Allocation

Breakdown and weightings are as of 4.1.2021 and subject to change.

Increased Total Return Potential with Financials

Financial companies may provide the potential for steady returns over time through the combination of capital appreciation and dividend payouts. In fact, dividends represent more than 45% of total return for the financials sector¹, which may make it attractive for investors in search of income. Companies that operate within this industry are highly regulated, which may result in transparency for investors and shareholders. The financials sector comprises about 11% of the S&P 500[®] Index² and is classified as a cyclical sector, meaning that it tends to be closely correlated to the performance of the overall market and economy. The chart below, which compares the beta of each of the 11 S&P 500 sector indices, shows that despite the historical cyclicity of the sector, its volatility relative to the market has had one of the strongest declines over the past 10 years. This may be representative of an improvement in the sector's balance sheets and growth models, which Guggenheim believes may lead to continued dividend growth.

To offer investors convenient access to the financials sector, Guggenheim created the **Financials Portfolio**. The portfolio seeks to invest in several dozen financial stocks covering a variety of industries within the financials sector, including asset management, banks, insurance and financial exchange and data companies. Constructed with an emphasis on strong balance sheets, profitability and industry leadership, the portfolio may offer more diversified financial sector exposure than a cap-weighted sector portfolio, which can be dominated by a few large financial stocks.

CHANGE IN FIVE-YEAR BETA BY SECTOR, NOW VS 10 YEARS AGO (3.1.2016 - 2.28.2021)

Source: Morningstar, 2.28.2021. **Past performance is no guarantee of future results.** The chart is for illustrative purposes only; it is not meant to forecast, imply or guarantee the future results of any Guggenheim Investments product. There is no guarantee that the trends and projections noted above will continue or come to fruition and they are subject to change. The **S&P 500[®] Financials Index** comprises those companies included in the S&P 500[®] that are classified as members of the GICS[®] financials sector. The Trust will not try to replicate the performance of the Index and will not necessarily invest any substantial portion of its assets in securities in the Index. Indices are unmanaged and it is not possible to invest directly in the indices. **Beta** is a statistical measure of volatility relative to the overall market. A positive beta indicates movement in the same direction as the market, while a negative beta indicates movement inverse to the market. Beta for the market is generally considered to be 1. A beta above 1 and below -1 indicates more volatility than the market. A beta between 1 and -1 indicates less volatility than the market.

Financials Portfolio, Series 17

PORTFOLIO SUMMARY

Inception Date	4.5.2021
Termination Date	4.5.2023
Initial Offer Price	\$10.00
Number of Issues	40
Historical Annual Dividend Distribution ⁵	\$0.1615
Distributions	25th day of each month commencing on 4.25.2021, if any

⁵ The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

TICKETING INFORMATION

CUSIP (cash payment)	40176X440
CUSIP (reinvestment accounts)	40176X457
CUSIP (fee-cash)	40176X465
CUSIP (fee-reinvest)	40176X473
Ticker	CFINQX

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C ⁶	\$0.225	2.25%
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.275	2.75%
Fee/Wrap Accounts ⁷		
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.050	0.50%

⁶ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing November 2021 and ending January 2022 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit. ⁷For unit prices other than \$10, percentage of the C&D fee will vary.

The Financials Portfolio, Series 17 is a Unit Investment Trust.

****INDEX DEFINITION:** The Russell 3000® Index is composed of the 3,000 largest U.S. companies ranked by total market capitalization, representing approximately 98% of the U.S. investable equity market. The Index is unmanaged and it is not possible to invest directly in the index.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses and other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • The Trust is concentrated in the financial sector; the factors that impact the financial sector will likely have a greater effect on this Trust than on a more broadly diversified trust. The profitability of companies in the financial sector is largely dependent upon the availability and cost of capital which may fluctuate significantly in response to changes in interest rates and general economic developments. Financial sector companies are subject to the adverse effects of economic recession, decreases in the availability of capital, volatile interest rates, portfolio concentrations in geographic markets and in commercial and residential real estate loans, and competition from new entrants in their fields of business. • The Trust includes securities issued by small-cap and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to

adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.

This material is not intended as a recommendation or as investment advice of any kind, including in connection with rollovers, transfers, and distributions.
