

Global Balanced Income Builder Portfolio, Series 17

Investment Objective

The Global Balanced Income Builder Portfolio, Series 17 (Trust) seeks current income as the primary objective, with the potential for capital appreciation as a secondary objective.

Key Considerations

- **50/50 Blend:** The portfolio is comprised of approximately 50% global dividend-paying equities and approximately 50% ETFs that invest in fixed-income securities with exposure to both developed and emerging market economies, as of the inception date.
- **Balanced Approach to Growth & Income:** The strategy offers investors exposure to high growth areas such as emerging market equities while also providing a high level of income potential through equity dividends and multiple fixed-income sectors.
- **Enhance Diversification:** The portfolio is strategically balanced, as of date of deposit, between equities and fixed-income ETFs seeking to provide enhanced diversification¹ through low correlation.

¹ Diversification neither assures a profit nor eliminates the risk of experiencing investment losses.

The Global Balanced Income Builder Portfolio, Series 17 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain, difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • The Trust invests in shares of ETFs, which are subject to various risks, including management's ability to meet the fund's investment objective. Shares of ETFs may trade at a discount from their net asset value in the secondary market. This risk is separate and distinct from the risk that the net asset value of the ETF shares may decrease. You will bear not only your share of your Trust's expenses, but also the expenses of the underlying ETFs. By investing in ETFs, the Trust incurs greater expenses than you would incur if you invested directly in the ETFs. • The ETFs are subject to annual fees and expenses, including a management fee. Unitholders of the Trust will bear these fees in addition to the fees and expenses of the Trust. • The Trust is subject to an ETF's index correlation risk. • The value of the fixed-income securities in the ETFs will generally fall if interest rates, in general, rise. The Trust may be subject to greater risk of rising interest rates than would normally be the case due to the current period

Going Global for a Balanced Approach to Growth & Income

For growth and income, a balanced approach with global exposure may be attractive. Balanced investing, which combines equity and fixed-income asset classes, offers the potential to diversify and potentially reduce risk in a portfolio, while a global approach that extends across borders may offer enhanced growth and opportunities over a pure U.S.-focused portfolio.

Guggenheim's Global Balanced Income Builder Portfolio provides access to both global equity and fixed-income securities in one portfolio. The approximately 50% equity allocation of the portfolio is split between dividend-paying U.S. equities and dividend-paying American Depositary Receipt (ADR)/Global Depositary Receipts (GDR) equity securities, representing both developed and emerging markets. The remaining approximately 50% fixed-income allocation is comprised of fixed-income exchange traded funds (ETFs), investing in both domestic and international fixed-income securities that Guggenheim believes may have the potential for current income. The Portfolio seeks to offer investors upside potential, while minimizing volatility to improve the overall risk/return characteristics of the portfolio.

of historically low rates. • An ETF or an issuer of securities held by an ETF may be unwilling or unable to make principal payments and/or to declare distributions in the future, may call a security before its stated maturity, or may reduce the level of distributions declared. Issuers may suspend dividends during the life of the Trust. This may result in a reduction in the value of your units. • The financial condition of an ETF or an issuer of securities held by an ETF may worsen, resulting in a reduction in the value of your units. This may occur at any point in time, including during the primary offering period. • Economic conditions may lead to limited liquidity and greater volatility. • Certain ETFs held by the Trust invest in securities that are rated below investment-grade and are considered to be "junk" securities, speculative and are subject to greater market and credit risks; the risk of non-payment or default is higher than with investment-grade securities. Such securities may be more sensitive to interest rate changes and more likely to receive early returns of principal in falling rate environments. • Certain ETFs held by the Trust may invest in securities that are rated as investment-grade by only one rating agency. As a result, such split-rated securities may have more speculative characteristics and are subject to a greater risk of default than securities rated as investment-grade by more than one rating agency. • The Trust invests in U.S.-listed foreign securities, including New York Registry shares, and ADRs and certain ETFs held by the Trust invest in foreign securities, which presents additional risk beyond those of domestic securities. Foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country. • The Trust and certain ETFs held by the Trust invest in securities issued by companies headquartered in countries

considered to be emerging markets, which may be exposed to greater volatility and market risk, including the possibility of investment and trading limitations, liquidity concerns, delays and disruptions in settlement transactions, political uncertainties and dependence on international trade and development assistance. • Certain ETFs held by the Trust may invest in securities whose value may be dependent on currency exchange rates. The U.S. dollar value of these securities may vary with fluctuations in foreign exchange rates. Most foreign currencies have fluctuated widely in value against the U.S. dollar for various economic and political reasons. • The Trust invests in securities issued by mid-cap companies and certain ETFs held by the Trust may invest in securities issued by small-and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments, and customarily involve more investment risk than securities of large-capitalization companies. • Share prices or distributions on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare distributions in the future and, if declared, whether they will remain at current levels or increase over time. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Global Balanced Income Builder Portfolio, Series 17

PORTFOLIO SUMMARY

Inception Date	3.30.2021
Termination Date	3.30.2023
Initial Offer Price	\$10.00
Number of Issues	77
Historical Annual Dividend Distribution ²	\$0.3105
Distributions	25th day of each month commencing on 4.25.2021, if any

² The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the Trust.** The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

TICKETING INFORMATION

CUSIP (cash payment)	40176X226
CUSIP (reinvestment accounts)	40176X234
CUSIP (fee-cash)	40176X242
CUSIP (fee-reinvest)	40176X259
Ticker	CGBLQX

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C ³	\$0.225	2.25%
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.275	2.75%
Fee/Wrap Accounts ⁴		
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.050	0.50%

³ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing October 2021 and ending December 2021 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

⁴ For unit prices other than \$10, percentage of the C&D fee will vary.

RISK CONSIDERATIONS (CONTINUED) Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.
