

Large-Cap Core Portfolio, Series 37

Investment Objective

The Large-Cap Core Portfolio, Series 37 (Trust) seeks to maximize total return by investing in U.S.-listed stocks of large-capitalization companies.

Key Considerations

- **Potential to Reduce Volatility:** With the potential for stable dividends, adding an allocation of large-cap equities to an investor's overall well-balanced portfolio may also help to dampen portfolio volatility.
- **Established Companies:** Provides exposure to large U.S.-listed companies—typically household names with strong brand recognition and global operations representing all sectors of the U.S. economy.
- **Attractive Fundamentals:** Guggenheim selects stocks, through both quantitative and qualitative analysis, that it believes have strong fundamental characteristics.

Growth Potential with Established Global Industry Leaders

Over the last 20 years, large-capitalization stocks have provided approximately 15 percent less volatility than mid- and small-capitalization stocks¹. Typically mature, established companies with the ability to do business globally can take advantage of opportunities inaccessible to smaller companies. Recognizing the need for these global industry leaders in a well-balanced portfolio, Guggenheim created the Large-Cap Core Portfolio. The Trust consists of U.S.-listed large-capitalization equities that may provide stability and growth potential, as well as strong fundamentals.

² The Historical Annual Dividend Distribution (HADD) is as of 2.27.2020 and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

³ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing September 2020 and ending November 2020 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

⁴ For unit prices other than \$10, percentage of the C&D fee will vary.

The Large-Cap Core Portfolio, Series 37 is a Unit Investment Trust.

INDEX DEFINITION: The Russell 3000[®] Index ("Index") measures the performance of the largest 3000 U.S. companies representing approximately 98 percent of the investable equity market. The Index is unmanaged and it is not possible to invest directly in the Index.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. This can happen for reasons such as these: • Securities prices can be volatile. • The Trust invests significantly in the information technology sector. The factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence

of products and services. Sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.
