

Multinational Titans Portfolio, Series 18

Investment Objective

The Multinational Titans Portfolio, Series 18 (Trust) seeks to maximize total return through capital appreciation.

Key Considerations

- **Growth Opportunity:** An allocation to U.S.-listed stocks which derive a growing portion of revenue from emerging markets may help diversify an overall balanced investment portfolio.*
- **Emerging Market Exposure:** The portfolio provides exposure to emerging markets through U.S. equities which may help reduce foreign trading risks typically associated with emerging market investing.
- **Increased Consumerism:** By 2030 it is estimated that the world's middle class will grow to 5.3 billion people,² with much of this growth coming from emerging markets. A growing emerging market middle class may indicate more discretionary income, which in turn may increase spending.**

*Diversification does not ensure a profit or eliminate the risk of loss.

Conservative Emerging Market Exposure

Guggenheim believes exposure to emerging markets has become an important and integral part of a global equity allocation because gross domestic product (GDP) growth in these markets is nearly twice as high as that of the U.S.¹ Investing in historically stable, U.S.-listed companies that derive a growing portion of their revenues from emerging markets may help investors to gain access to the growth opportunity presented by emerging market economies with less risk. On average, these industry leaders have historically been able to earn over 46% of their total revenues from these fast growing markets, as illustrated below.

With this in mind, Guggenheim Funds Distributors, LLC created the Multinational Titans Portfolio, which invests in U.S.-listed global companies. The Trust seeks companies that offer access to the potential growth of emerging markets without investing directly in the local foreign markets.

³ The Historical Annual Dividend Distribution (HADD) is as of 2.6.2020 and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

⁴ The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing September 2020 and ending November 2020 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

⁵ For unit prices other than \$10, percentage of the C&D fee will vary.

INDEX DEFINITIONS: The **Top 100 S&P 500® Average** is comprised of the top 100 S&P 500 constituents ranked by their percentage of revenue derived from emerging markets. The **S&P 500® Average** represents the average percentage of revenue derived from emerging markets by S&P 500 constituents. The **S&P 500® Index (Index)** is a capitalization-weighted index of 500 stocks. The Index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The Trust will not try to replicate the performance of the Index and will not necessarily invest any substantial portion of its assets in securities in the Index. Indices are unmanaged and it is not possible to invest directly in the indices.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. • The Trust is concentrated in the consumer products sector. The factors that impact the consumer products sector will likely have a greater effect on this Trust than on a more broadly diversified trust. General risks of companies in the consumer products sector include cyclicalities of revenues and earnings, economic recession, currency fluctuations, changing consumer tastes, extensive competition, product liability litigation and increased government regulation. A weak economy and its effect on consumer spending would adversely affect companies in the consumer products sector. • The Trust is concentrated in the information technology sector. The factors that impact the information technology sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend

with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth. • The Trust invests in a U.S.-listed foreign security and in companies that do significant business in foreign countries. Securities of foreign issuers present risks beyond those of domestic securities. The Trust's investment in companies that do significant business in foreign countries presents additional risk. Securities of such companies are subject to the risk that foreign countries may be more volatile than the United States due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls with respect to certain industries or differing legal and/or accounting standards. • The Trust includes securities issued by companies that do significant business in countries considered to be emerging markets, which may be exposed to greater volatility and market risk. The performance of the securities included in the Trust may be dependent, in part, on the growth or decline of emerging market countries. Risks of investing in companies that do significant business in developing or emerging countries include, among other concerns, political uncertainties and dependence on international trade and development assistance. In addition, the economies of emerging market countries may be extremely volatile and subject to increased risks. • The Trust invests in securities issued by mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the

Trust may decline during the life of the Trust. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units.
