

NDR Precious Metals & Miners Portfolio, Series 17

Investment Objective

The NDR Precious Metals & Miners Portfolio, Series 17 (Trust) seeks to provide total return through capital appreciation by investing in a diversified portfolio of common stocks and non-investment company exchange traded funds (ETFs).

Key Considerations

- **Diversification:** Due to their historically low correlation to the broad equity market, commodities may add a layer of diversification to investor portfolios.*
- **Inflation Hedge:** Adding commodities to a portfolio may help investors better weather an inflationary environment.
- **Powered by NDR:** Offers access to NDR's comprehensive global research capabilities and their proprietary, multi-factor economic model to determine the blend of mining stocks and precious metals ETFs for the Trust.

* Diversification does not ensure a profit or eliminate the risk of loss.

Portfolio Allocation

Breakdown and weightings are as of 9.19.2019 and subject to change.

CAPITALIZATION BREAKDOWN (EXCLUDES ETFs)**

COUNTRY HEADQUARTERED WEIGHTINGS

Canada	32.78%
South Africa	7.47%
United States	5.01%
Morocco	2.51%
Australia	2.46%
Total	50.23%

COUNTRY CLASSIFICATION BREAKDOWN

Developed	90.02%
Emerging***	9.98%
Total	100.00%

**Represents a percentage of the common stock asset class which amounts to 50.23% of the overall portfolio as of 9.19.2019 and is subject to change.

***Emerging Countries include Morocco and South Africa.

Precious Metals as a Diversifier

Guggenheim believes that one of the basic tenets of investing is the importance of diversification in overall investment portfolio construction. When used as part of an overall investment portfolio, precious metals may be used as a diversifier due to their low correlation to other asset classes, providing the potential to mitigate risk. Guggenheim Funds Distributors, LLC (the Sponsor) has partnered with Ned Davis Research, Inc. (NDR) to create the NDR Precious Metals & Miners Portfolio. Utilizing NDR's comprehensive global research capabilities and proprietary multi-factor economic model, NDR selects a blend of high quality stocks of global metals and mining producers, and precious metals ETFs for inclusion in the Trust. This may provide investors with an opportunity to participate in equity market upside as a strategic allocation.

The chart below shows historical correlations of precious metals to various major asset classes. Perfect correlation (assets that move identically), have correlations of 1, while lower numbers indicate the assets move differently than each other.

S&P GSCI PRECIOUS METALS INDEX CORRELATION TO MAJOR ASSET CLASSES (9.1.2009–8.31.2019)

Index definitions on next page. Past performance is not a guarantee of future results. There is no guarantee that the trends and projections will continue or come to fruition and they are subject to change. The chart is for illustrative purposes only; it is not meant to forecast, imply or guarantee the performance of any Guggenheim Investments product. Source: Morningstar, 8.31.2019.

Correlation is a measure of how indexes move in relation to each other. Correlation coefficients can range from -1.00 to +1.00. The value of -1.00 represents a perfect negative correlation, while a value of +1.00 represents a perfect positive correlation. A value of 0.00 represents a lack of correlation among the indexes.

NDR Precious Metals & Miners Portfolio, Series 17

PORTFOLIO SUMMARY

Inception Date	9.20.2019
Termination Date	10.20.2021
Initial Offer Price	\$10.00
Number of Issues	23
Historical Annual Dividend Distribution¹	\$0.0000
Distributions	25th day of each month commencing on 10.25.2019, if any

¹ The Historical Annual Dividend Distribution (HADD) is as of 9/19/2019 and subject to change. There is no guarantee the issuers of the securities included in the Trust will declare dividends or distributions in the future. The HADD of the securities included in the Trust is for illustrative purposes only and is not indicative of the Trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the Trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in Trust expenses or the sale or maturity of securities in the portfolio.

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C²	\$0.225	2.25%
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.275	2.75%

Fee/Wrap Accounts³

Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.050	0.50%

TICKETING INFORMATION

CUSIP (cash payment)	40175B225
CUSIP (reinvestment accounts)	40175B233
CUSIP (fee-cash)	40175B241
CUSIP (fee-reinvest)	40175B258
Ticker	CPMMQX

² The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing April 2020 and ending June 2020 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

³ For unit prices other than \$10, percentage of the C&D fee will vary.

The NDR Precious Metals & Miners Portfolio, Series 17 is a Unit Investment Trust.

INDEX DEFINITIONS: The **S&P GSCI Precious Metal Index** is a world production-weighted index that provides a benchmark for investment performance in the precious metals market. The **S&P 500® Index** is a capitalization-weighted index designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. The **MSCI World Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance for developed markets. The **Bloomberg Barclays Global High Yield Index** measures the performance of global high yield fixed income markets. It represents the U.S. High Yield, Pan-European High Yield, U.S. EM High Yield and Pan European EM High Yield Indices. The **MSCI Emerging Markets Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance in the global emerging markets. The **Bloomberg Barclays Global Aggregate Index** measures the performance of the global investment grade fixed-rate debt markets, including the U.S. Aggregate, Pan-European Aggregate, Asian-Pacific Aggregate, Global Treasury, Eurodollar, Euro-Yen, Canadian and Investment Grade 144A index-eligible securities.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved. The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. • The Trust is concentrated in the materials sector. The factors that impact the materials sector will likely have a greater effect on this Trust than on a more broadly diversified trust. General risks of companies in the materials sector include the general state of the economy, consolidation, domestic and international politics and excess capacity. Materials companies may also be significantly affected by volatility of commodity prices, import controls, worldwide competition, liability for environmental damage, depletion of resources and mandated expenditures for safety and pollution control devices. • The Trust is concentrated in securities issued by Canadian companies. The Canadian economy is dependent on the demand for, and supply and price of, natural resources, and the Canadian market is relatively concentrated in issuers involved in the production and distribution of natural resources. A small number of sectors, including the materials sector, represent a large portion of the Canadian market. • The Trust invests significantly in SPDR® Gold (GLD) Shares, which will likely have a greater effect on this Trust than on a more broadly diversified trust. The GLD Trust holds physical gold. The investment objective of the GLD Trust is for the GLD Shares to reflect the performance of the price of gold bullion, less the

GLD Trust's expenses. The value of the GLD Shares relates directly to the value of the gold held by the GLD Trust and fluctuations in the price of gold could materially adversely affect an investment in the GLD Shares. The value of the Trust may be adversely impacted by changes in the value of the GLD Shares. • The Trust includes securities issued by companies involved in the precious metals business, which are subject to risks associated with the exploration, development and production of precious metals including competition for land and difficulties in obtaining required governmental approval to mine land. The price of gold and other precious metals is subject to wide fluctuations and may be influenced by limited markets, expected inflation, central bank demand and availability of substitutes. • The Trust includes securities issued by companies involved in the metals and mining business. Risks of investing in metals and mining company stocks include inaccurate estimates of mineral reserves and future production levels, varying expectations of mine production costs, technological and operational hazards in mining and mine development activities and mandated expenditures for safety and pollution control devices. • The Trust invests in shares of ETFs, which are subject to various risks, including management's ability to meet the fund's investment objective. You will bear not only your share of your trust's expenses, but also the expenses of the underlying ETFs. By investing in ETFs, the Trust incurs greater expenses than you would incur if you invested directly in the ETFs. • The ETFs are subject to annual fees and expenses. Unitholders of the Trust will bear these fees and expenses in addition to the fees and expenses of the Trust. • An ETF or an issuer of securities held by an ETF may be unwilling or unable to declare dividends in the future or may reduce the level of dividends declared. This may result in a reduction in the value of your units. • The financial condition of an ETF or an issuer of securities held by an ETF may worsen, resulting in a reduction in the value of your units. This may occur at any point in time, including during the primary offering period. • The Trust includes securities issued by companies involved with the production of certain commodities. General risks of commodity companies include price and supply fluctuations, excess capacity, economic recession, government regulations and overall capital spending rates. Exposure to commodities markets may subject the Trust to greater volatility than other investments. • The Trust invests in foreign securities listed on foreign exchanges and U.S.-listed foreign securities, which presents additional risk beyond those of domestic securities. Foreign risk is the risk that foreign securities will be more volatile than U.S. securities due to such factors as adverse economic, currency, political, social or regulatory developments in a country. • The Trust includes securities whose value may be dependent on currency exchange rates. The U.S. dollar value of these securities may vary with

fluctuations in foreign exchange rates. Most foreign currencies have fluctuated widely in value against the U.S. dollar for various economic and political reasons such as the activity level of large international commercial banks, various central banks, speculators, hedge funds and other buyers and sellers of foreign currencies. • The Trust invests in securities issued by small- and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-capitalization companies. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust. • Inflation may lead to a decrease in the value of assets or income from investments. • Unitholders may be subject to a financial asset reporting risk. Depending upon the size of a unitholder's investment in the Trust and the unitholder's other investments, a unitholder may have an obligation to report holdings of non-U.S. financial assets. Each unitholder should consult their own financial and legal advisors as to whether such reporting obligations apply to them. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.
