

Dow 50 Growth Portfolio, Series 19

Investment Objective

The Dow 50 Growth Portfolio, Series 19 (Trust) seeks to maximize total return primarily through capital appreciation.

Key Considerations

- **High Conviction Multi-Cap Growth Allocation:** The trust invests in U.S.-listed small-, mid- and large-cap growth stocks that Guggenheim believes may make an attractive component to an investor's overall portfolio.
- **Growth at a Reasonable Price (GARP):** The trust seeks to select companies that reinvest in themselves, possess attractive relative valuations and sustainable growth rates.
- **Avoid Growth Traps:** The trust's rigorous selection process seeks to eliminate growth stocks that may have a higher likelihood of losses due to their stock prices reaching levels no longer supported by fundamentals.

Past performance is not a guarantee of future results. There is no guarantee that the trends and projections noted above will continue or come to fruition and they are subject to change.

PORTFOLIO SUMMARY

Inception Date	5.20.2022
Termination Date	8.17.2023
Initial Offer Price	\$10.00
Number of Issues	50
Historical Annual Dividend Distribution¹	\$0.0000
Distributions	25th day of each month commencing on 6.25.2022, if any

TICKETING INFORMATION - CUSIPS

Cash	40177H626
Reinvest	40177H634
Fee/Cash	40177H642
Fee/Reinvest	40177H659
Ticker	CSUSSX

¹The Historical Annual Dividend Distribution (HADD) is as of the day prior to trust deposit and subject to change. There is no guarantee the issuers of the securities included in the trust will declare dividends or distributions in the future. **Due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the trust may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the HADD figure will likely be higher, and in some cases significantly higher, than the actual distribution rate achieved by the trust.** The HADD of the securities included in the trust is for illustrative purposes only and is not indicative of the trust's distribution rate. The HADD is the weighted average of the trailing twelve-month distributions paid by the securities included in the portfolio and is reduced to account for the effects of fees and expenses, which will be incurred when investing in the trust. The HADD will vary due to certain factors that may include, but are not limited to, a change in the dividends paid by issuers, a change in trust expenses or the sale or maturity of securities in the portfolio.

Broader Growth Opportunity with a Multi-Cap Portfolio

Sometimes stock prices of growth companies reach levels not supported by fundamentals, possibly reflecting unsustainable growth trajectories. These "growth traps" can undermine a portfolio's performance as future growth rates slow. To help provide investors access to sustainable growth opportunities, Guggenheim created the **Dow 50 Growth Portfolio**. By targeting "self-funding" growth companies that generate strong profits and reinvest them for a virtuous cycle of sustained growth, Guggenheim's approach seeks to avoid speculative growth stocks. The portfolio focuses on the 50 stocks that Guggenheim believes have the highest sustainable growth potential for the life of the trust and weights them based on the company's sustainable growth rate,* seeking to avoid portfolio domination by a few large stocks.

Top 10 Portfolio Holdings

Portfolio holdings are weighted by sustainable growth rate,* are as of 5.19.2022 and subject to change.

*Sustainable growth rate is the return on equity multiplied by retained earnings.

The Dow 50 Growth Portfolio, Series 19 is a Unit Investment Trust.

RISK CONSIDERATIONS: As with all investments, you may lose some or all of your investment in the Trust. No assurance can be given that the Trust's investment objective will be achieved.

The Trust also might not perform as well as you expect. This can happen for reasons such as these: • Securities prices can be volatile. The value of your investment may fall over time. Market value fluctuates in response to various factors. Changes in legal, political, regulatory, tax and economic conditions may cause fluctuations in markets and securities prices, which could negatively impact the value of the Trust. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may adversely affect the economy, various markets and issuers. Recently, the outbreak of a novel and highly contagious form of coronavirus ("COVID-19") has adversely impacted global commercial activity and contributed to significant volatility in certain markets. Many governments and businesses have instituted quarantines and closures, which has resulted in significant disruption in manufacturing, supply chains, consumer demand and economic activity. The potential impacts are increasingly uncertain,

difficult to assess and impossible to predict, and may result in significant losses. Any adverse event could materially and negatively impact the value and performance of trust and the Trust's ability to achieve its investment objectives. • Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust and there is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. • Securities selected according to this strategy may not perform as intended. The investment decisions, including the use of the Santa Monica Quantitative (SMQ) Alpha Score, may not produce the intended results and there is no guarantee that the investment objective will be achieved. • The Trust invests in "growth" stocks, which may be more volatile than other stocks. If the perception of a company's growth potential is not realized, the securities purchased may not perform as expected, reducing the Trust's return. Because different types of stocks tend to shift in and out of favor depending on market and economic conditions, "growth" stocks may perform differently from the market as a whole and other types of securities. • The Trust is concentrated in the information technology sector. The factors that impact the information technology **(CONTINUED ON REVERSE)**

Dow 50 Growth Portfolio, Series 19

Portfolio Allocation

Breakdown and weightings are as of 5.19.2022 and subject to change.

CAPITALIZATION BREAKDOWN

SALES CHARGES

Sales Charge (S/C) is based on a \$10 per unit offering price.

Standard Accounts	Amount Per Unit	Percentage of Public Offering Price
Deferred S/C ²	\$0.135	1.35%
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.185	1.85%
Fee/Wrap Accounts ³		
Creation and Development (C&D) Fee	\$0.050	0.50%
Total S/C	\$0.050	0.50%

² The deferred sales charge (DSC) is a fixed amount and will be deducted in monthly installments on the last business day commencing September 2022 and ending November 2022 or upon early redemption. For unit prices other than \$10, percentages of C&D fees, and DSCs will vary but in no event will the maximum sales charge (S/C) exceed the total S/C. Early redemption of units will still cause payment of the DSC. However, an initial sales charge, which is equal to the difference between the maximum S/C and the sum of any remaining deferred S/C charges and C&D, will be charged if the price paid for units exceeds \$10 per unit.

³ For unit prices other than \$10, percentage of the C&D fee will vary.

RISK CONSIDERATIONS (CONTINUED) sector will likely have a greater effect on this Trust than on a more broadly diversified trust. Companies involved in this sector must contend with rapid changes in technology, intense competition, government regulation and the rapid obsolescence of products and services. Sector predictions may not materialize and the companies selected for the Trust may not represent the entire sector and may not participate in the overall sector growth. • The Trust invests in securities issued by small- and mid-cap companies, which may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments. These securities customarily involve more investment risk than securities of large-cap companies. • The Trust may be susceptible to potential risks through breaches in cybersecurity. • The Trust is subject to risks arising from various

operational factors and their service providers. Although the Trust seeks to reduce operational risks through controls and procedures, there is no way to completely protect against such risks. • Inflation may lead to a decrease in the value of assets or income from investments. **Please see the Trust prospectus for more complete risk information.**

Unit Investment Trusts are fixed, not actively managed and should be considered as part of a long-term strategy. Investors should consider their ability to invest in successive portfolios, if available, at the applicable sales charge. UITs are subject to annual fund operating expenses in addition to the sales charge. Investors should consult an attorney or tax advisor regarding tax consequences associated with an investment from one series to the next, if available, and with the purchase or sale of units. Guggenheim Funds Distributors, LLC does not offer tax advice.
